The following provisional Census Table, issued by the Superintendent of Census Operations, Bengal, is published for general information :—

IMPERIAL TABLE XVII.—Caste, tribe, race, nationality or Muslim social group.

This table corresponds to imperial table XIII of 1921, but for reasons of public economy there has been some modification of the principle on which groups shown have been chosen. Amongst Muslims only 3 groups are distinguished : these are (*a*) 'Mumin' (Jolahas), some of the leading men amongst whom desired that separate figures should be presented for their group ; (*b*) Sayyads; and (*c*) Others : figures for these groups are to be sought as subsidiary details to the total of Muslims given as group No. 106 in the table. Other groups than Muslims are mainly Hindu castes. In 1921 details were given for all castes having or approaching 1 per mille of the population and further details were given in an appendix to the table for groups only found in certain parts of the province. On the present occasion sorting for Hindus was confined to those groups forming 4 mille of the population in 1921 unless they were of the 'depressed classes' or were included for some other particular reason, e.g., the Rajputs and Malis added at the direction of the Census Commissioner. Hill tribes and groups of aboriginal derivation, whether completely or partly or not at all hinduised were also included and appear in the table. The restricted sort for this table results in the omission of particulars for the following groups shown either in the table or in its appendix in 1921. Muslim groups are distinguished with an asterisk.

2. An innovation is the presentation of figures for those who gave no return of caste— these figures include not only outcastes and some prostitutes but also a number who repudiate the caste system or declined to return their caste upon conviction or for some other reason. For tribes professing more than one religion subsidiary figures are given for each religion returned. In addition to the name chosen to give groups their alphabetical position, other caste names are also given in brackets in some cases. All persons returned under any of these designations are included in the figures of the group although some of the names are new coinages current nowhere outside the caste claiming them, whilst others (e.g., Chandal) have probably fallen out of use entirely and were returned only to ensure that such returns if made might not be overlooked. Figures for sub-castes returned by Brahmans are given in a supplement after the table.

3. In the result the table shows figures for 48,958,198 persons in Bengal and 108,948 persons in Sikkim out of a total population of 51,087,338 and 109,808, respectively. The composition of the numbers not included in this table is given summarily below by religion and (so far as is shown in other tables) by race:

13. Buddhists	123,469	60,166	63,303	208	122	86

The first nine groups do not come under caste divisions at all and in the case of Jains, Sikhs, Jews, Parsis, Anglo-Indians, Indian Christians and Indians of indefinite beliefs the race can be deduced from the description. Similarly most persons returned as 'Confucians' may be reasonably assumed to be Chinese as well as those specifically so returned. For Europeans and allied races details are shown by British nationality in imperial table XIX. Table XIX also gives the detailed distribution of Anglo-Indians which can moreover be found in the title page and supplement No. II to imperial table XVI. The detailed distribution by districts of Jains, Sikhs, Jews, Parsis, Chinese (both those so returned and also Confucians), Indian Christians, Christians of 'Other races' and Indians of indefinite beliefs can also be found in imperial table XVI or its supplements and title page. An analysis of all Indian Christians by racial, tribal or provincial affiliation is given for the total number in Bengal and Sikkim in the supplement to imperial table VIII and a subsidiary table to Chapter IX of the report. The only groups therefore in the above list for which no figures whatever are recorded by race, caste or tribe are Nos. 10-13. These form a total of 1,957,058 in Bengal and 625 in Sikkim or less than 384 and 57 respectively in each 10,000 of the total population.

DEPARTMENT OF AGRICULTURE, BENGAL.

PRELIMINARY FORECAST OF THE JUTE CROP OF BENGAL, 1932.

[NOTE.—**On an average of the five years ending 1929-30, the area under jute in Bengal, to which this forecast relates, represents some 88·3 per cent. of the total area under jute in British India.**]

The Preliminary Forecast deals only with the estimates of area sown and the condition of the crop at the time of publication of the forecast. The estimates of area are based on information received through the Collectors from the Revenue staff; also from Panchayets and Agricultural Officers.

Area sown in 1932.—In Bengal, returns for the present season show a total area of 1,638,900 acres, an increase of about 25,200 acres, or about 1·6 per cent. as compared with the figures for 1931.

Character of the season.—At the outset the weather was favourable for sowings in certain low-land tracts of East Bengal, but drought, which extended up till the middle of April, interfered with the progress of the operation. In North Bengal sowings commenced late in consequence. Since then conditions have been favourable for field operations and for the growth of the young crop generally. Good rainfall in the latter part of May facilitated sowings in West and parts of North Bengal.

Present state of the crop.—The present state of the crop is favourable on the whole.

Stocks.—Large stocks of old jute are reported from several districts.

Director of Agriculture, Bengal (Offg.).

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

PRELIMINARY FORECAST OF THE JUTE CROP OF BIHAR AND ORISSA, 1932.

[NOTE.—**On an average of the five years ending 1929-30, the area under jute in which Bihar and Orissa Forecast relates, represents about 7·6 per cent. of the total area under jute in British India.**]

The present forecast deals only with the estimated area sown. It gives also a general survey of prospects, but makes no reference to the probable outturn either in percentage figures or in bales.

2. **Acreage.**—I estimate the area sown during the current and four preceding years in round numbers as follows:—

Year.	Acreage.
1928	... 247,000
1929	... 238,000
1930	... 238,000
1931	... 148,800
1932	... 157,000

3. **Weather conditions.**—In March light rain fell in Cuttack and Balasore. There was no rain in the remaining jute districts. The fall was below the normal in these two districts. In April light rain fell in all the jute districts. The fall was above the normal everywhere except Champaran, the Santal Parganas and Cuttack. In May light to moderate rain fell in all the jute districts. The fall was below the normal everywhere except Balasore. In June rain fell in all the jute districts. The fall was light everywhere except Darbhanga where it was moderate. The weather conditions are reported to be not favourable in the important districts of Purnea and also in Darbhanga owing to insufficiency of rain. Sowings are still going on in Cuttack and Balasore.

4. **District returns.**—Last year's area under jute was finally estimated at 148,800 acres. The total area under jute this year is estimated by District Officers in round number at 157,000 acres. This estimate appears to be fairly correct. The increase in comparison with last year is due to the marked fall in the prices of food-grains and also a possible expected rise in jute prices this year.

5. **Condition and prospects.**—The condition of the crop is fair.

6. **General.**—The quantity of jute which remains in the jute districts from the crops of 1931 is reported to be small, except in Bhagalpur and in parts of Purnea, where large stocks are reported to be still in hand.

The statement below compares the estimated area under jute in this province this year with the preliminary and final figures of last year:—

Bhagalpur	Bhagalpur ..	2,661,120	1,684,100	2,700	2,075	1,167	Much ..	Last week of April. (Normal).	The decrease in the area under jute this year is due to the present low price of the crop.
	Purnea ..	3,196,160	1,694,400	178,800	120,000	130,000	Much in Araria. Little in Sadar and Kishanganj.	May 1932 ..	The weather and rainfall have not been favourable. The present condition of the crop is fair. The sowings were late at places for want of timely rainfall while at others they were normal where sown in low lands. Those sown timely on high lands had to suffer for want of rains or did not germinate at all. The crop will suffer more if there be no sufficient rains soon. The increase in area under the crop is due to the marked fall in the prices of food grains (particularly paddy) and also the expected rise in the price of jute this year.

DEPARTMENT OF AGRICULTURE, ASSAM.

PRELIMINARY FORECAST OF THE JUTE CROP OF ASSAM, 1932.

[NOTE.—**On the average of the five years ending 1929-30 the area under jute in Assam represents 5·0 per cent. of the total area under jute in British India.**]

1. **Season.**—The weather has been generally favourable for the cultivation and growth of the crop, except in the upper districts of the Assam Valley where heavy rains have retarded the growth of the young plants. Some damage by hailstorms has also been reported in the Goalpara district. The present condition of the crop is, however, generally satisfactory and a better outturn than that of last year is expected in all the important jute growing districts with the exception of Darrang.

2. **Area sown.**—The total area under jute as estimated by the Deputy Commissioners is 107,100 acres against 99,300 acres (revised) of last year. There is an increase in area in Sylhet, Nowgong and Garo Hills, while Goalpara, Kamrup, Darrang, Sibsagar and Lakhimpur show a decrease in area, the net increase over last year's final figure being 7,800 acres.

3. **Stock.**—According to the reports of the Deputy Commissioners little jute remains in stock from last year's crop except in the districts of Nowgong and Darrang.

	Acres.	Acres.	Acres.	Acres.	Acres.			
Cachar ..	200	200	200	..	..	None ..	First week of April. Normal.	The weather has been favourable for the cultivation and growth of the crop. The present condition of the crop is good and the outturn is expected to be better than that of last year.
Sylhet .	15,000	5,000	12,000	7,000	..	Little ..	Middle of April. Normal.	Favourable weather conditions at sowing time account for the increase in area. The present condition of the crop is fair and a better outturn than that of last year is expected.
Goalpara ..	60,000	35,300	32,700	..	2,600	A small quantity remains.	First part of April. Normal.	The decrease in area is due to the low price of jute. The weather has been favourable for the growth of the crop and the outturn is expected to be better than that of last year. Hail-storms caused some damage in places.
Kamrup ..	28,000	19,100	18,000	..	1,100	Little ..	Beginning of April. Normal.	The decrease in area is due partly to relinquishment of jute growing land by the Kumari-khata Estate and partly to the general fall in price of jute. The weather at sowing time was not very favourable but has since improved, and the present condition of the crop is good. The outturn is expected to be normal.
Darrang ..	12,600	13,700	12,200	..	1,500	About a quarter remains.	Beginning of April. Normal.	The low price of jute is responsible for the decrease in area. The weather has not been favourable for the cultivation and growth of the crop owing to drought followed by heavy rains, which damaged the crop especially in the Mangaldai subdivision. The present condition of the crop is not satisfactory and the outturn is expected to be less than that of last year
Nowgong ..	50,000	20,400	26,100	6,000	..	Considerable jute remains.	First week of March. Early.	The increase in area is due to extension of cultivation. The weather at sowing time of the crop was not favourable but has improved since the middle of May. The present condition of the crop is fair and the outturn is expected to be better than that of last year.
Sibsagar ..	400	400	300	.	100	None ..	Middle of April. Normal.	Unfavourable weather conditions at sowing time account for the decrease in area. The weather has not been altogether favourable for the growth of the crop up to date but the present condition of the crop is reported to be generally fair, and the outturn is expected to be as good as that of last year.
Lakhimpur ..	1,000	900	800	..	100	None ..	First week of April. Normal.	The decrease in area is due to unfavourable weather at sowing time. The weather has not been favourable for the growth of the crop and the outturn is expected to be worse than that of last year.
Garo Hills (Plains)	5,000	4,300	4,500	200	..	None ..	First week of April. Normal.	The weather has been favourable for the cultivation and growth of the crop. The present condition of the crop is good and a better outturn than that of last year is expected.

IMPERIAL TABLE XIII.

Literacy by religion, age and sex.

This table corresponds to imperial table VIII of 1921. It shows by sexes figures for those literate (able to write a letter to a friend and to read the reply), illiterate and literate in English. Details are given by age-groups for all religions found in the case of Bengal and British Territory in Bengal and for the principal religions in each district, city or state. The table is divided into four parts. Part A gives details for Bengal (British districts and states) and for Bengal (British Territory). In part B figures are given for each district (including Calcutta) and state in Bengal. Figures for cities are given in part C: those for Calcutta alone are not here repeated but they are included in an aggregate for Calcutta and the suburbs of Calcutta in the 24-Parganas. Part D gives figures for Sikkim. In all parts of the table quinary age-groups are shown up to 20 followed by one group for 20 and over, and returns claiming literacy for children less than 5 years old have been included amongst the illiterate.

2. The details for Christians in the table include figures for 81 persons (male 71, female 10) who returned indefinite beliefs as their religion. Particulars of their distribution are given in the title page to imperial table VII.

3. A supplement printed after the table shows details by age-groups of those persons in each sex who have reached at least the upper primary standard of education. For Bengal (British Territory) and for each division details are given for every religion returned. For districts and states the details are confined to the principal religions locally professed. The age-groups shown are 7-13, 14-16, 17-23 and 24 and over.

IMPERIAL TABLE XIV.—Literacy of selected castes, tribes, races and social groups by locality and sex.

This table, corresponding to imperial table IX of 1921, gives for selected groups figures for Bengal (including states) and Sikkim similar to those in imperial table XIII. The necessity of public economy has reduced the number of groups shown in the table from 89 to 41, but it has been attempted to make the table within this restriction as representative as possible. For comparison with each other and with the figures given for Muslims in imperial table XIII, particulars are here given of two Muslim social groups, Jolahas and Sayyads. The figures for Anglo-Indians and Indian Christians render possible comparisons with other communities, after eliminating the distortion introduced by the inclusion of Europeans and others in the figures of Christians given in table XIII. The table also contains figures for groups constituting the " upper classes " of Hindu society (Brahmans, Baidyas and Kayasthas) and representing the " depressed classes " (Bagdis, Bauris, Chamars, Dhobis, Doms, Haris, Jaliya-Kaibarttas, Kalus, Namasudras and Sunris), aboriginals and hill tribes (Chakmas, Garos, Lepchas, Mrus, Mundas, Oraons, Santals and Tiparas), the trading classes (Agarwalas and Shahas), artizans and functional groups (Kamars, Kumhars, Jogis and Napits), typical cultivators of West Bengal (Mahishyas), an immigrant caste of Nepal (Khambus—chosen because it was hoped that returns for this caste would be less inaccurate than those for such groups as Khas, Mangars, etc.) and a sectarian caste (Baishnab). Separate figures are given for members of aboriginal or hill tribes professing different religions. Figures for Kalus are included in imperial table XVII with those for Telis but are here given separately for comparison with former years.

2. Of the groups shown, Agarwalas mainly reside in Calcutta. Bagdis, though found throughout the whole of Bengal, are most numerous in the Burdwan and Rajshahi Divisions. Mundas, Oraons and Santals are principally found in West, Central and North Bengal. Chakmas and Mrus are practically confined to Chittagong and the Chittagong Hill Tracts, Garos to Mymensingh, Khambus and Lepchas to Darjeeling and Sikkim and Tiparas to the Chittagong Hill Tracts and Tripura State. Anglo-Indians are rarely found outside Calcutta and other towns. Other groups are dispersed in considerable numbers throughout all parts of the province. More detailed particulars of local distribution are given in imperial table XVII.

3. The statement below shows by sexes for 21 of the groups given in the table, the total population aged 7 and over. For these groups the total figures of literates in the table exclude those so returned who are under 7 years of age.

4. For the remaining 20 groups shown in the table but not included in paragraph 3, the figures of literates in the table include in addition to those aged 7 and over also those aged 4- 6 years except in the districts of Rajshahi, Dinajpur, Jalpaiguri, Rangpur, Bogra and Pabna, the Siliguri subdivision of Darjeeling and Cooch Behar State. For comparison with the figures given in the statement above, a supplement printed below the table shows for these 20 groups the total population and literates aged 7 years and over in the districts just mentioned.

5. A further analysis of Indian Christians by age-group and sex is given in the report volume, where they are further divided according to their racial, tribal or provincial affiliations.

6. The total population given for the groups in the table differs in some instances from that shown in imperial table XVII. The reason for this is that the figures in imperial table XVII include a number of doubtful returns classified after the preparation of this table had been undertaken.

CALCUTTA, THE 15TH JULY 1932.

RESOLUTION—No. 8996L.R.

Read—

The Survey and Settlement Reports for the year ending 30th September 1931.

The main traverse work consisted of 583½ square miles in Hooghly and post-pointing traverse for air survey of 740½ square miles in Rangpur. Traverse was also done of scattered areas totalling 421 square miles during the year. In Hooghly, work was delayed by frequent sickness among the field staff. Other work done by the Survey Department included demarcation, comparative mapping, and reproduction of maps. Though the number of sheets printed was less than usual it came to over 737,000.

2. Major settlement operations were in their closing stages in the districts of Murshidabad-Birbhum, but were in full swing in 24-Parganas, Burdwan-Hooghly and Malda.

3. In Malda the area under cadastral survey (Block B) was 781 square miles. Owing to dense jungle along the banks of the rivers Mehananda and Kalindri and the mango gardens, which cover over

32 square miles in this block, only about 62 per cent. of the area could be done by air survey instead of 90 per cent. as originally intended.

4. The total area in the province for which a record-of-rights has been completed is 53,797 square miles out of 65,094 square miles to which the Bengal Tenancy Act applies. Over a million copies of printed records (khatians) were sold during the year, and the receipts for sales of maps, plot indices and khatians together came to Rs. 82,632.

5. It is satisfactory that out of the total recovery of Rs. 16,41,595 only Rs. 2,90,139 was realised by coercive measures and the balance represents voluntary payments.

6. Mr. L. R. Fawcus, I.C.S., was in charge of the Department till 9th January 1931, when Mr. J. B. Kindersley, I.C.S., took over and remained in charge for the rest of the year. The Governor in Council has much pleasure in acknowledging the efficiency and care with which the Departments of Survey and Settlement have been managed in the year under review. His Excellency in Council is also pleased to direct that the good work done by the Survey Officers, Mr. I. Newton and Major C. B. Sexton, the Settlement Officers, Messrs. B. E. J. Burge, M.O. Carter, P. D. Martyn, K. A. L. Hill, S. N. Roy (II), Rai Bijay Bihari Mukharji Bahadur and Rai Romesh Chandra Sen Bahadur and the Cadastral Charge Officer of Burdwan, Mr. A. Hughes, as also by the other officers mentioned in the concluding paragraphs of the Survey and Settlement Reports be recorded.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*.

Resolution on the Final Report on the Flood of July and August 1931, in the district of Bogra.

GOVERNMENT OF BENGAL.

Revenue Department.

Land Revenue.

CALCUTTA, THE 16TH JULY 1932.

RESOLUTION—No. 9057 L.R.

Read—

Letter No. 83 M.C.T., dated the 1st June 1932, from the Commissioner of the Rajshahi Division, submitting a final report on the flood of July and August 1931 in the district of Bogra.

The report deals with the operations for the relief of distress caused by the flood which began in the Bogra district on the 24th of July and lasted for twenty-three days. The district consists mainly of two distinct areas—the western portion known as Khair area and the eastern portion known as the Pali. Winter paddy is the only important crop grown in the Khair area and the principal crops of the Pali area are jute, aus and aman rice. Boro and Katar paddy and rabi crops are also grown in this area. The economic condition of the people of this area was not good, owing to the fall in the price of jute and other agricultural produce since 1929. Distress already prevailed in the eastern part of district, owing to the fall in prices and the flood of 1930, which seriously damaged much of the aman paddy. The flood of July and August 1931 was the severest on record and appears to have been due to the fact that the Jamuna or Brahmaputra was in high flood at a time when the local rainfall was very heavy. During the month of July there were 20.25 inches of rainfall as against 9·36 inches and 9·09 inches in the two previous years. The highest level was reached on the 1st August 1931 and it was 3½ feet higher than the water level of ordinary years. Only the eastern portion of the district known as the Pali area was affected by the flood. Out of the total area of the thanas concerned, viz., 421,064 acres with a population of 562,726 an area of 278,170 acres with a population of 383,153 was seriously affected. About half the aus paddy had been reaped before the flood, but a portion of this was also damaged. Newly transplanted paddy and seedlings were destroyed by submersion and most of the ordinary broadcast aman paddy was either destroyed or severely damaged. Much of the jute, however, survived the flood. Katar aus paddy was sown extensively after the flood and reaped in November, and it was possible to retransplant aman paddy in a considerable area. A few cattle were lost and a number of huts collapsed within the jurisdiction of Dhunat and Sariakandi police-stations. Though there was no loss of human life directly due to the floods, an epidemic of cholera broke out subsequently in the flooded area. The epidemic was confined to an area of 18 miles by 12 miles, and the measures taken checked the spread of the epidemic and brought it under control. Twenty Sanitary Inspectors and one doctor of the district board worked under the control of the District Health Officer. Four doctors were also sent to the area by the Public Health Department. Sixty-eight thousand persons were inoculated.

2. The Hon'ble Sir B. B. Ghosh, Member of the Executive Council, with the Member, Board of Revenue, and the Secretary of the Revenue Department visited part of the distressed area on the 8th September 1931. The Divisional Commissioner and the Director of Agriculture also visited the affected area.

3. Relief measures were promptly undertaken by Government and the district board. The main forms of relief consisted of :—

Gratuitous relief.—Gratuitous relief was given at first by the district board. Gratuitous relief was distributed by Government through 33 distributing centres. Relief was given chiefly in the shape of cash and doles of rice and cloth. The amount spent through all the sources amounted to Rs. 7,520, out of which Government contributed Rs. 4,297, the balance being contributed by the district board and by private persons. Private organisations did good work and co-operated with the

Government relief committees. Acute distress continued up to the harvesting of Katar aus and aman paddy, after which the situation improved and further distribution of gratuitous relief was not necessary.

Test relief.—Test relief works were started after the flood water subsided. The works consisted of the construction and repair of roads. About 24 miles of new katcha roads were constructed and about 51 miles of old roads were improved by employing 43,549 units at a total cost of Rs. 9,056. The entire amount was advanced by Government.

Agricultural loans.—A sum of Rs. 1,00,000 was sanctioned by Government for Agricultural loans. Out of this a sum of Rs. 99,299 was distributed by the District Officer during the period from August 1931 to March 1932.

4. The Governor in Council is satisfied that the measures taken for relief of distress were successful and adequate. He desires to record his appreciation of the good work done by Rai Anath Bandhu De Bahadur and Mr. S. N. Roy, I.C.S., the former Collectors of the district, Rai A. K. Mukherji Bahadur, the present Collector, Babu Jagadish Chandra Bardhan, Maulvi Hashmutullah, Babu Monaranjan Das Gupta, Maulvi Khondkar Abdul Latif and Babu Birendra Kumar Bose, Sub-Deputy Collectors, Babu Sasanka Sakar Chakrabarty, probationary Sub-Deputy Collector, Babu Prafulla Chandra Banerji, Manager, Jaipur Government Estates, the District Health Officer and the local relief committees. He also desires to acknowledge the readiness with which the chairman and the vice-chairman of the district board and the District Engineer co-operated with the Collector.

ORDER—Ordered that this resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

H. C. V. PHILPOT,

Secy. to the Govt. of Bengal.

These applications will be forwarded to the office of the Inspector of Schools. The Inspector of Schools will then countersign the applications of those candidates who pass the test and forward them to the candidates direct for transmission to the Registrar with the fees for the examination.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 22nd July 1932.

I. **Character of the season.**—During the month under review, the rainfall was below the average, except in Hooghly, Rajshahi, Jalpaiguri, Darjeeling, Malda, Chittagong, Chittagong Hill Tracts, and Cooch Behar State, where it was above the normal. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Preparatory tillage for winter paddy and of its sowing in seed-beds continued favourably. Reaping of low-land jute commenced in some districts of East Bengal.

III. **State of standing crops.**—Standing crops generally thrived well.

IV. **Prospects and probable outturn.**—The outlook of deep-water paddy and sugarcane is favourable, on the whole. A satisfactory outturn of autumn paddy may be expected.

V. **Damage to standing crops.**—No appreciable damage to standing crops was reported from any part of the Province.

VI. **Condition of agricultural stock.**—The condition of live-stock was, on the whole, fair. Sporadic cases of cattle-disease, however, were reported from ten districts of the Province.

VII. **Failure of pasturage and fodder.**—The supply of fodder was reported to be generally sufficient.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the retail prices of common rice of the cheapest quality rose in seven districts, fell in seven and remained stationary in the rest of the Presidency. The prices varied from 15½ seers per rupee in Midnapore to 10 seers in Darjeeling and the Chittagong Hill Tracts.

IX. **Condition of agricultural population.**—The condition of the agricultural population is not satisfactory owing to fall in the prices of jute and other staples. Distress prevails in parts of Rangpur, Bogra, Pabna and Mymensingh, where test and other relief works are continuing.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 27th July 1932.

Forecast of the Summer Til (Sesamum) crop of Bengal, 1932-33.

(NOTE.—On an average of the five years ending 1929-30, the area under til in Bengal has represented some 2·6 per cent. of the total area under til in British India.)

Character of the season.—At the outset the weather was not favourable for sowing and for the early period of growth. Good weather which prevailed from the middle of April helped the subsequent germination and growth, especially in the important districts of Mymensingh, Faridpur and Tippera. On the whole the season was a satisfactory one for the crop.

Acreage.—The area sown this year is estimated at 109,900 acres as against 111,700 acres last year.

Outturn.—From the District Officers' estimates the average outturn of the crop for the Province works out at 82 per cent. of the normal this year as against 70 per cent. last year.

Taking the normal yield as 7⅜ maunds per acre, the gross outturn of the crop for the Province is estimated at about 24,500 tons this year as against 17,200 tons last year or an increase of about 42 per cent. over last year.

Director of Agriculture, Bengal (offg.).

Resolution on the Report on the Police Administration in the town of Calcutta and its suburbs for the year 1931.

GOVERNMENT OF BENGAL.

Police Department.

CALCUTTA, THE 2ND AUGUST 1932.

RESOLUTION—No. 3516Pl.

Read—

The Report on the Police Administration in the town of Calcutta and its suburbs for the year 1931.

The office of the Commissioner of Police was held from 1st January to 4th March by Sir Charles Tegart and from the 5th March to the end of the year by Mr. L. H. Colson, I.P.

2. **Strength.** — The sanctioned strength of the Calcutta Police at the close of the year was, 5,658, a decrease of 89 as compared with last year's figure. The number of resignations was 18 against 51 in the previous year. There was a decrease of 5 in the number of vacancies at the end of the year, and the Governor in Council is pleased to note that the revised rates of pay continue to attract a better type of recruit to the force. His Excellency in Council also observes with satisfaction that, in spite of the continuous strain placed upon all ranks owing to the civil disobedience movement and its after effects, there was a further improvement in the health of the force during the year, the average daily percentage of the sick falling from 1·92 to 1·52.

3. **Housing.**—The Commissioner of Police has again remarked on the unsatisfactory condition of the police buildings in the suburban areas and the necessity for their early improvement. His Excellency in Council regrets that improvement in this direction should still be held up owing to financial stringency.

4. **Discipline.**—A good standard of discipline continued to be maintained and the small number of cases in which judicial punishments were inflicted on members of the force, or in which orders of dismissal or degradation were passed, is noticeable.

5. **Crime statistics.**—There was a substantial all round decrease in the total number of cognisable cases reported to the police during the year. The marked fall in the number of rioting cases, which was 18 against 103 in the previous year, was due to the calling off of the civil disobedience movement.

The Detective Department as usual rendered valuable assistance to the local police and investigated a number of difficult cases very successfully. His Excellency in Council notes with pleasure the smart work done by the special detective staff of the Port Police in detecting a number of arms smuggling cases and in arresting a number of terrorists with unlicensed firearms in their possession.

6. **Revolutionary crime, seditious speeches and meetings.**—Terrorist activities continued throughout the year. Mr. R. R. Garlick, District and Sessions Judge, 24-Parganas, was murdered in his court-room, an attempt was made on the life of Mr. Villiers, President of the European Association, Bengal, and one Ashutosh Neogi, who had given important evidence for the Crown in an armed dacoity case, was murdered. As in the previous year, the Indian press not only continued its support of the Congress but also with a few exceptions its campaign of eulogy of political murderers. It is significant that a representative and responsible body like the Corporation of Calcutta passed a resolution expressing its "sense of grief" at the execution of Dinesh Gupta, one of the murderers of Colonel Simpson, Inspector-General of Prisons. There were a number of prosecutions for seditious speeches and no less than 75 publications were proscribed. The circulation of communist literature continued.

7. **Public order.**—Throughout the year, picketing was continued with varying intensity, and there were frequent *hartals*, processions and public meetings in furtherance of the Congress campaign against Government, while the difficulties of the situation were in no way diminished by the Irwin-Gandhi agreement which tied the hands of the authorities but was utilised by Congress as an opportunity to reorganise and

prepare for fresh activities. The most disquieting feature of the situation was the constant extolling of political assassins as martyrs and heroes by the press and nationalist leaders, while on the other side the murders themselves and the way in which murderers were eulogised naturally evoked intense feelings of indignation especially among the European community. Added to this was the general lawlessness which was an aftermath of the Civil Disobedience Movement.

The burden which in this tense political atmosphere was placed on the shoulder of the police in 1931 was thus a heavy one. His Excellency takes this opportunity of expressing his high appreciation of the steadfastness, loyalty, courage and devotion displayed by all ranks of the force in the discharge of their duties in such difficult circumstances.

8. **Traffic.**—The general trade depression was reflected in the returns of the Motor Vehicles Branch. The registration of private cars alone dropped by one-third. Only 46 new taxi-cabs were registered in 1931 as compared with 122 and 263 in the two previous years and only 106 new motor omnibuses as compared with 168 and 226. It is satisfactory that considerably fewer cases under the Motor Vehicles Act were pending at the close of the year than there were in 1930.

9. **Commendation of officers.**—His Excellency in Council is gratified to read the tributes paid by Mr. Colson to his Deputy Commissioners, Assistant Commissioners and other subordinate officers. 1931 was less fraught with violence than 1930, but the situation was never free from anxiety, and the Calcutta public may well be grateful to all ranks of the Calcutta Police force for their constant vigilance and for the care and attention which they devoted to their duties. The thanks of Government are due to Mr. Colson for maintaining the high standard of efficiency which he inherited from his predecessor.

ORDER.—Ordered that a copy of this resolution be forwarded to the Commissioner of Police, Calcutta, the Chief Presidency Magistrate, Calcutta, and the Commissioner of the Presidency Division, for information.

Ordered also that a copy of the report be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

H. J. TWYNAM,

Chief Secy. to the Govt. of Bengal (offg.).

Resolution on the Report of the Director of Public Health, the Sanitary Board and the Chief Engineer, Public Health Department, for the year 1930.

CALCUTTA, THE 8TH AUGUST 1932.

RESOLUTION—No. 1698 P.H.

Minister-in-charge: The Hon'ble Mr. Bijoy Prasad Singh Roy.

Read—

The Report of the Director of Public Health, the Sanitary Board and the Chief Engineer, Public Health Department, for the year 1930.

Vital statistics.—The vital statistics per mille in the Report on Public Health for 1930 are still based on the census figures for 1921, an anachronism necessitated by the want of any reliable data for annual adjustment of the figures for population. The preliminary census returns for 1931 illustrate the margin of error in the annual vital statistics referred to in this Resolution last year. The population of Bengal, excluding the Chittagong Hill Tracts, appears in the 1931 census as 49,909,363 against 46,522,293 in the census of 1921 showing an increase of 3,387,070.

The increase in population for the same area during the same period derived from the annual returns of births and deaths is only 1,463,471. Local movements of population in and out of the province affect the figures for increased population, but cannot by any stretch be made to cover more than a small fraction of this difference between the census and registration results. Defective as the annual returns are known to have been, especially where responsibility for them has been transferred from the police to presidents of union boards, a margin of error of over 100 per cent. on the registration figures for increased population brings prominently to notice the seriousness of their defects. Reduced to an annual margin of error on births the figures are not quite so surprising as they seem at first sight, but they do mean approximately that the increase of population in 1930, as in previous years, may or may not have been at least double and in some years must have been more than double that reported by the Director of Public Health on the basis of registration returns. Or, to particularise further, the figures for 1930 (viz., births 1,237,931, deaths 1,044,256, increase of population 193,675) are in all probability vitiated by a defect of error between 10 and 20 per cent. on the reported births. This inaccuracy can only be overcome by insistent pressure on presidents of union boards and municipal authorities and rural and urban sanitary inspectors to discharge more effectively the unattractive but important routine duties of verifying birth and death returns subject to this general inaccuracy. The figures for 1930 show a decrease of 123,347 births and of 50,007 deaths on those for 1929; and it appears that apart from Calcutta the seven districts showing an excess of deaths over births in 1930 comprise a block in the centre of the province from Jessore to Dinajpur. It is noticeable that they do not include any in the Burdwan Division.

Infant mortality.—It cannot be said that on the statistics for the province as a whole there has been much improvement in infant mortality. The total number of deaths reported under one year of age decreased from 244,000 to 231,000; but the rate per thousand births rose from 179·9 to 187·3. The maternity welfare work conducted by the Health Department of the Calcutta Corporation and by a voluntary association in Dacca continues to show what can be done in urban areas by the necessary organisation with a permanent paid staff. There are movements in the same direction in one or two district headquarters towns; but for the most part maternity welfare work even in municipal areas does not go much beyond the annual baby week with its lectures and exhibitions, of which there were 180 in this year, and the local training of dais; while in the rural areas it is still more difficult to effect much practical impression. The number of dai training classes outside Calcutta and Dacca increased to 98 and of dais attending to 1,118—less than one dai given elementary training per 1,000 births in the year. But though the actual figures are still far

from encouraging, the fact remains that the consciousness of the need for maternity welfare work exists and is on the increase throughout the province.

Cholera.—The statistics for cholera and small-pox continue to show parallel features. The year 1928 was a peak year for both, and the sharp decrease appearing in 1929 was continued in 1930. The deaths from cholera were 54,963 as against 81,090 in 1929, and had fallen from twice the quinquennial average in 1928 to 33 per cent. below the quinquennial average. It would be interesting to know whether the curve of the decline compared with that of earlier epidemics can be brought into any specific relation with the use of the new methods of inoculation now so readily accepted where cholera is prevalent. Dacca was the only district which did not share in the decrease of cholera. As usual the public health resources of the district boards were supplemented as occasion required by advice and assistance from the Public Health Department to cope with local epidemics. 1,184,415 cubic centimetres of anti-cholera vaccine were issued against 1,718,610 in the previous year and 1,021,541 inoculations performed against 1,566,150. 82,100 wells and 28,840 tanks were also disinfected over and above 2,982 river ghats and other sources of water. The Public Health Department also organised the provision of facilities for inoculation against cholera of pilgrims proceedings to the important festivals, such as the Kumbh Mela, the Puri Rathjatra and the Ganga Sagar Mela. The continued absence of cholera at the Ganga Sagar Mela is a conspicuous instance of what can be done for public health on these occasions by the organised co-operation of district board and Public Health Department.

Small-pox.—There were 3,150 deaths from small-pox in towns and 8,118 in rural areas against 1,003 and 19,404, respectively, in the previous year. The respective death-rates were 1·01 and ·19 against ·32 and ·44 in 1929, showing an increase of 215·6 per cent. in towns and decrease of 56·8 per cent. in rural areas. With the downward curve continuing small-pox was a comparatively small factor in the mortality in rural areas for 1930, but if the Director of Public Health is correct in forecasting the trend of this epidemic, the figures should soon be on the rise again. Unfortunately the figures for infant vaccination were allowed to fall off with the decrease of the epidemic—only 253 infants per 1,000 births being successfully vaccinated during the year as against 280 in the previous year. The Director of Public Health reports that nine municipalities including two with a large labour population carried out no vaccination in 1930, a failure which requires further investigation. The vaccination statistics for the province show a decrease throughout (except under the head of children between one year and six years); but this was perhaps inevitable in view of the marked decrease in small-pox and the postponement for financial reasons of projects for universal vaccination of the population in a limited period.

Malaria and Kala-azar.—In last year's Resolution attention was drawn to the fact that mortality from malaria had been more than halved since the figures for the maximum year 1921, when 737,000 deaths were ascribed to this cause. There was an almost imperceptible reaction in 1930 with 336,879 deaths against 335,414 in the previous year. While, on the other hand, the returns under the other heads of fever which must probably include a certain amount of malaria showed a slight further decrease of 338,399 against 350,273. These figures certainly tend to strengthen the impression mentioned last year that some permanent result has been achieved by the intensive campaign against malaria in the last ten years in effecting a genuine reduction of this disease, though doubtless it will have its fluctuations in the future as in the past. The figures for death from kala-azar for the last three years have been stable with a very slight upward trend, the number of deaths from this cause in 1930 was 10,914 or 94 in excess of the previous year. At the same time the number of cases treated continues to decrease (110,017 in 1930) which is to be explained perhaps as well by variations in the number of special centres as in the prevalence of the disease.

Rural health units.—The scheme for the organisation of rural health units has now reached saturation point, with 575 sanitary inspectors or assistant health officers, each in charge of an area corresponding to a thana. The cost of the scheme to Government in

the year under review was Rs. 9,40,000 and it will be some time before the effect of incremental pay and expansion of activities brings the demand for grants up to the full allotment originally contemplated of Rs. 12,00,000. The working of these units has been mentioned in the Resolution on district boards, and it is sufficient for the purpose of this Resolution to mention the value of this additional force when occasion arises to mobilise all available resources under the direction of the Director of Public Health to cope with special emergencies. The district boards have, on the whole, shown great readiness to co-operate with the Director of Public Health in making the best use of rural sanitary inspectors and to accept his advice on the technical aspect of this organisation.

Educational Propaganda and Publicity.—Four hundred and eighty-six lectures on public health were delivered throughout the province by the publicity staff under the Public Health Department with or without lantern slides. The extensive health propaganda carried out by the staff resulted in the organisation by some district boards of their own propaganda departments under their respective Health Officers. It is hoped that when financial conditions improve other district boards will organise similar propaganda departments with a view to educating the rural people in public health matters.

Public health engineering.—In works of public health engineering it is the beginning and completion that counts and in this light the outstanding event of the year 1930 was the start made with the Bhatpara Sewerage Scheme estimated to cost Rs. 22,00,000. Otherwise the most important work under construction during the year, though not formally completed till after its close, was the Asansol Water-supply Scheme Rs. 4,50,000. Improvements in the water-supply of Dacca, Faridpur, Patuakhali and Bansberia municipalities were completed and a beginning was made with water-supply works at Chandpur, Narayanganj and English Bazar. Estimates were prepared in various stages for new works up to a total of Rs. 31,00,000, only a fraction of which, it is to be feared, will now materialise in sanction and expenditure. The criterion of activity afforded by actual expenditure during the year on works under construction under the supervision of the Chief Engineer does not however seem to have been provided for in the form of this officer's report and might be introduced.

Personal.—Dr. C. A. Bentley made over charge of the office of Director of Public Health during the year after a tenure of office of 15 years which has made an indelible impression on the public health record of Bengal. It would be difficult to say how much the whole spirit of public health work in this province owes to Dr. Bentley's personal impetus. He was succeeded by Dr. Khambata who has twice previously acted in this capacity: while Mr. Griffin remained in charge of the post of Chief Engineer, Public Health Department. To both these officers the Minister desires to express his appreciation of the results of the year.

Resolution on the Annual Report of the Bengal Smoke Nuisances Commission for the year 1931.

GOVERNMENT OF BENGAL.

Commerce Department.

CALCUTTA, THE 5TH AUGUST 1932.

RESOLUTION—No. 4481Com.

Read—

The Annual Report of the Bengal Smoke Nuisances Commission for the year 1931.

The report records steady progress in the abatement of smoke in Calcutta and environs. During the year the Commission was able to secure a further reduction in the emission of daily black smoke; the average emission from each factory chimney, which, during the previous year was the equivalent of ·18 minutes of dense black smoke per hour, was reduced to ·08 minutes during the year. This is by far the lowest figure yet recorded.

The great increase in the number of the inspections and tests made for educational purposes, and the number of the cases observed, coupled with a decrease in the number of statutory warnings issued and the continued absence of prosecutions, testifies to the continuance of the good and useful work carried on by the Commission in co-operation with the interests concerned. It is unfortunate that owing to financial stringency it has not been possible for Government to give effect to several recommendations made by the Commission for increasing the scope of its activities.

The thanks of the Governor in Council are due to the members of the Commission, and to Mr. R. Grant, the Chief Inspector and Secretary, and his assistants for a successful year's work.

By order of the Governor in Council,

Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 11th August 1932.

First Forecast of the Sugarcane Crop of Bengal, 1932-33.

(NOTE.—On an average of the five years ending 1930-31, the area under sugarcane in Bengal has represented some 7·0 per cent. of the total area under sugarcane in British India.)

Character of the season.—At the outset the weather was generally favourable for planting of the crop in East Bengal districts, while insufficient rainfall interfered with the progress of the operation in some West and North Bengal districts. Good weather which prevailed from the latter part of April helped germination and growth. The present prospects, so far, are reported to be satisfactory, on the whole.

Area planted.—The total area planted with sugarcane for the province is reported to be 229,000 acres this year as against 200,300 and 233,400 acres reported in the corresponding and final forecasts of last year.

Director of Agriculture, Bengal (offg.).

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 9th August 1932.

First Forecast of the Cotton crops of Bengal, 1932-33.

(NOTE.—On an average of the five years ending 1930-31, the area under the cotton crops in Bengal has represented some 0·2 per cent. of the total area under cotton in India.)

There are two crops, early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore. As the late crop has not yet been sown, this forecast deals only with the early crop.

Character of the season.—In Bankura, Mymensingh and Tripura State, the weather was generally favourable. In Mymensingh subsequent conditions were not so favourable, and the outturn therefore seems poor. In Midnapore and the Chittagong Hill Tracts the weather was not favourable, and the condition of the crop seeems to be fair for the former district only. The outturn is expected to be poor in the Chittagong Hill Tracts for want of timely rainfall. The condition of the crop at present is fair, on the whole.

Area sown.—The area sown is reported to be 74,345 acres this year as against 74,312 acres in the corresponding forecast of last year. The slight increase is due to general causes.

Director of Agriculture, Bengal (offg.).

CALCUTTA, THE 12TH AUGUST 1932.

RESOLUTION—No. 10272L.R.

Read—

The Report of the Board of Revenue on the administration of the Wards, Attached and Trust Estates in the Presidency of Bengal for the year 1337 B.S. (1930-31).

1. At the beginning of the year the number of estates under the management of the Court of Wards was 90. During the year nine new estates were brought under the charge of the court and one was released; thus the total number was 98 at the close of the year.

2. The total current demand due to the estates on account of rent and cesses was Rs. 1,55,39,565 and the arrear demand Rs. 1,93,68,227. The total sum collected was Rs. 1,20,26,246 or 34·4 per cent. of the total demand or 77·4 per cent. of the current demand against 41·3 per cent. or 88·2 per cent., respectively, in the preceding year. The heavy outstanding balances were mainly due to bad economic conditions.

3. The total amount of ascertained debt outstanding at the close of the year was Rs. 2,50·30 lakhs against Rs. 2,07·84 lakhs in the preceding year. This total includes Rs. 156 lakhs owed by three big estates. The principal and interest paid or otherwise reduced amounted to Rs. 26·46 lakhs and Rs. 15·17 lakhs, respectively. In 22 out of 26 estates for which schemes of repayment have been prepared, it has not been possible to reduce the debts to the extent provided in the schemes. The debts of the 62 estates, which still remain in debt, have been reduced on the average by about one quarter since they came under the court. Many of these estates have been taken charge of recently.

4. The percentage of cost of management on current rent and cess demand showed a satisfactory reduction, being 9·2 against 11.9 in the previous year. The law expenses rose to Rs. 7·98 lakhs from Rs. 6·65 lakhs in 1929-30.

5. The Governor in Council notices with satisfaction that nearly Rs. 4 lakhs as against a little over Rs. 3½ lakhs in the preceding year was spent on education, dispensaries and works improvement.

6. During the year under review, owing to the widespread economic distress and to the fall in the price of agricultural produce, collections were poor and in many cases Government revenue was in arrear and general and audit rates remained unpaid. The Board has however taken steps to avoid such arrears, and it is hoped that this will not recur in future.

7. The thanks of the Governor in Council are due to the Board of Revenue for the administration of the estates under the management of the Court of Wards. He also notices with pleasure the good work done by the Managers mentioned in the report.

By order of the Governor in Council,

H. C. V. PHILPOT,

Secy. to the Government of Bengal.

Resolution on the Budget Estimates of income and expenditure of the Howrah Bridge for the year 1932-33.

GOVERNMENT OF BENGAL.

Marine Department.

CALCUTTA, THE 16TH AUGUST 1932.

RESOLUTION—No. 2172 MNE.

Read—

The budget estimates of income and expenditure of the Howrah Bridge for the year 1932-33.

Receipts.—The estimate of receipts for the year is placed at Rs. 3,16,340 against the budget and revised estimates of Rs. 3,57,428 and Rs. 3,10,566, respectively, for the previous year. The estimate of receipts from the East Indian Railway is placed at Rs. 2,42,000 on the basis of the revised estimate for the preceding year.

The Bengal Nagpur Railway have contributed Rs. 26,000 towards the maintenance of the bridge during the year 1932-33.

Expenditure.—The estimate of total expenditure for the year is Rs. 3,42,769 against the budget and revised estimates of Rs. 4,75,464 and Rs. 3,81,331, respectively, for the preceding year. The main reductions in expenditure are under the head "Maintenance and Repairs" and under the head "Establishment" due principally to the amalgamation of the separate workshop hitherto maintained for the Howrah Bridge with the subsidiary workshop of the Port Commissioners, Calcutta, at the Calcutta jetties. No provision has been made for special expenditure during the year.

Resolved that the budget estimates for the year 1932-33 be approved under section 21 of the Howrah Bridge Act, 1871.

By order of the Governor in Council,

E. N. BLANDY,

Secy. to the Govt. of Bengal.

No. 4120F.—29th August 1932.—Pending the framing of Provincial Contributory Provident Fund Rules on the model of the Contributory Provident Fund Rules (India), the Government of Bengal are pleased to make the following provisional rules, with the approval of the Government of India:—

Provisional Contributory Provident Fund Rules (Bengal).

1. These rules shall come into force on the 1st April 1932, and shall apply to non-pensionable Government servants belonging to the services under the control of the Governor in Council, who have been admitted or who may be admitted hereafter to the benefits of Special Provident Funds sanctioned by the Government of India.

2. In these rules, unless there is anything repugnant in the subject or context:—

(i) Account Officer means the Accountant-General, Bengal,

(ii) Leave means any variety of leave recognised by the Fundamental Rules or the Civil Service Regulations or the leave specified in the contract, whichever may be applicable to the subscriber.

(iii) The Fund means the Special Provident Fund.

Payments towards Insurance Policies and Family Pension Funds.

3. Subject to the conditions contained in rules 4 to 10—

(*a*) (i) subscriptions to a family pension fund approved in this behalf by the Governor in Council,

(ii) payments towards an insurance policy may, at the option of a subscriber, be substituted for the whole or part of subscriptions to the Fund;

(*b*) the amount of subscriptions with interest thereon standing to the credit of a subscriber in the Fund may be withdrawn to meet—

(i) payments towards an insurance policy;

(ii) purchase of a single payment insurance policy;

(iii) payments of single premia or subscriptions to a family pension fund approved in this behalf by the Governor in Council;

Provided that no amount shall be withdrawn to meet any payment or purchase made or effected more than twelve months before the withdrawal.

4. (1) If the total amount of any subscriptions or payments substituted under clause (*a*) of rule 3 is less than the amount of the minimum subscription payable to the Fund under the rules, the difference shall be rounded off to the nearest rupee (eight-annas counting as the next higher rupee) and paid by the subscriber as a subscription to the Fund.

(2) If the subscriber withdraws any amount standing to his credit in the Fund for any of the purposes specified in clause (*b*) of rule 3, he shall, subject to his option under clause (*a*) of that rule, continue to pay to the Fund the subscription payable under the rules.

5. (1) A subscriber who desires to substitute a subscription or payment under clause (*a*) of rule 3 may reduce his subscription to the Fund accordingly:

Provided that the subscriber shall—

(*a*) intimate to the Account Officer on his pay bill or by letter the fact of, and reason for, the reduction;

(*b*) send to the Account Officer, within such period as the Account Officer may require, receipts or certified copies of receipts in order to satisfy the Account Officer that the amount by which the subscription has been reduced was duly applied for the purposes specified in clause (*a*) of rule 3.

(2) A subscriber who desires to withdraw any amount under clause (*b*) of rule 3 shall—

(*a*) intimate the reason for the withdrawal to the Account Officer by letter;

(*b*) make arrangements with the Account Officer for the withdrawal;

(*c*) send to the Account Officer, within such period as the Account Officer may require, receipts or certified copies of receipts in order to satisfy the Account Officer that the amount withdrawn was duly applied for the purposes specified in clause (*b*) of rule 3.

(3) The Account Officer shall order the recovery of any amount by which subscriptions have been reduced, or any amount withdrawn, in respect of which he has not been satisfied in the manner required by clause (*b*) of sub-rule (1) and clause (*c*) of sub-rule (2), with interest thereon at the rate which is levied on an advance from the Fund, from the emoluments of the subscriber and place it to the credit of the subscriber in the Fund.

6. (1) Government will not make any payments on behalf of subscribers to insurance companies, nor take steps to keep a policy alive.

(2) It is immaterial what form the policy takes, provided that it shall be on the life of the subscriber himself and shall (unless it is a policy expressed on the face of it to be for the benefit of his wife, or of his wife and children, or any of them) be such as may be legally assigned by the subscriber himself to the Secretary of State in Council.

(3) The policy may not be effected for the benefit of any beneficiary other than the wife of the subscriber or his wife and children or any of them.

7. (1) The policy, within three months after the first withholding of a subscription or withdrawal from the Fund in respect of the policy, or in the case of an insurance company whose headquarters are outside India, within such further period as the Account Officer, if he is satisfied by the production of the completion certificate (*interim* receipt), may fix, shall—

(*a*) unless it is a policy expressed on the face of it to be for the benefit of the wife of the subscriber, or of his wife and children, or any of them, be assigned, by an endorsement on the policy in the Form set forth in the First Schedule, to the Secretary of State in Council, as security for the payment of any sum which may become payable to the Fund by the subscriber under rules 8 to 10 and delivered to the Account Officer;

(*b*) if it is a policy expressed on the face of it to be for the benefit of the wife of the subscriber, or of his wife and children, or any of them, be delivered to the Account Officer.

(2) The Account Officer shall satisfy himself by reference to the insurance company, where possible, that no prior assignment of the policy exists.

(3) If the policy is not assigned and delivered, or delivered, within the said period of three months or such further period as the Account Officer may, under sub-rule (1), have fixed, any amount withheld or withdrawn from the Fund in respect of the policy shall, with interest thereon at the rate which is levied on an advance from the Fund, forthwith be paid or repaid, as the case may be, by the subscriber, to the Fund, or, in default be ordered by the Account Officer to be recovered by deduction from the emoluments of the subscriber, by instalments or otherwise, as Government may direct.

(4) Notice of assignment of the policy shall be given by the subscriber to the insurance company, and the acknowledgment of the notice by the insurance company shall be sent to the Account Officer within three months of the date of assignment.

NOTE 1.—Subscribers are advised to send notice of the assignment to the insurance company in duplicate, accompanied, in cases in which the notice has to be sent to a company in Great Britain or Ireland, by a remittance of five shillings, which is the fee for the acknowledgment authorised by the Policies of Assurance Act, 1867. The policy itself, bearing the assignment endorsed thereon, need not be sent to the Company, as insurance companies do not ordinarily require the production of the original instruments affecting a policy-holder's title until the policy becomes a claim.

NOTE 2.—Subscribers who proceed to Great Britain or Ireland on quitting the service are advised that under the English Stamp Law assignments or reassignments are required to be stamped within 31 days of their first arrival in those countries. Otherwise penalty will be incurred under the Stamp Act, and difficulties may arise when the policy matures for payment.

8. (1) Save as provided by sub-rule (2) of rule 10, when the subscriber—

(*a*) quits the service, or

(*b*) has proceeded on leave preparatory to retirement and applies to the Account Officer for reassignment or return of the policy, or

(*c*) while on leave, has been permitted to retire or declared by competent medical authority to be unfit for further service and applies to the Account Officer for reassignment or return of the policy, or

(*d*) pays or repays to the Fund the whole of any amount withheld or withdrawn from the Fund for any of the purposes mentioned in sub-clause (ii) of clause (*a*) of rule 3 and sub-clauses (i) and (ii) of clause (*b*) of rule 3, with interest thereon at the rate which is levied on an advance from the fund,

the Account Officer shall—

(i) if the policy has been assigned to the Secretary of State in Council under rule 7 reassign the policy in the first Form set forth in the Second Schedule to the subscriber, and make it over to the subscriber:

(ii) if the policy has been delivered to him under clause (*b*) of sub-rule (1) of rule 7, make over the policy to the subscriber:

Provided that, if the subscriber, after proceeding on leave preparatory to retirement, or after being, while on leave, permitted to retire or declared by competent medical authority to be unfit for further service, returns to duty, any policy so reassigned or made over shall, if it has not matured or been assigned or charged or encumbered in any way, be again assigned to the Secretary of State in Council and delivered to the Account Officer, or again be delivered to the Account Officer, as the case may be, in the manner provided in rule 7, and thereupon the provisions of these rules shall, so far as may be, again apply in respect of the policy:

Provided further that, if the policy has matured or been assigned or charged or encumbered in any way, the provisions of sub-rule (3) of rule 7 applicable to a failure to assign and deliver a policy shall apply.

(2) Save as provided by sub-rule (2) of rule 10 when the subscriber dies before quitting the service, the Account Officer shall—

(i) if the policy has been assigned to the Secretary of State in Council under rule 7, assign the policy in the second form set forth in the Second Schedule to such person as may be legally entitled to receive it, and shall make over the policy to such person;

(ii) if the policy has been delivered to him under clause (*b*) of sub-rule 1 of rule 7, make over the policy to the beneficiary, if any, or, if there is no beneficiary, to such person as may be legally entitled to receive it.

9. (1) Save as provided by sub-rule (2) of rule 10, if a policy assigned to the Secretary of State in Council under rule 7 matures before the subscriber quits the service and before his death, the Account Officer shall realise the amount assured, and shall deduct therefrom the whole of any amount withheld or withdrawn from the Fund in respect of the policy, with interest thereon at the rate which is levied on an advance from the Fund and shall place the amount so deducted to the credit of the subscriber in the Fund. The balance, if any, shall, at the option of the subscriber, be paid to the subscriber or placed to the credit of the subscriber in the Fund.

(2) Save as provided by sub-rule (2) of rule 10, if a policy delivered to the Account Officer under clause (*b*) of sub-rule (1) of rule 7 matures before the subscriber quits the service and before his death, the Account Officer shall make over the policy to the subscriber, who shall pay or repay to the Fund the whole of any amount withheld or withdrawn from the Fund in respect of the policy with interest thereon at the rate which is levied on an advance from the Fund, and, in default, the provisions of sub-rule (3) of rule 7 applicable to a failure to assign and deliver a policy shall apply.

10. (1) If—

(*a*) the interest of the subscriber in the family pension fund ceases from any cause whatsoever, or

(*b*) the policy lapses or becomes assigned, otherwise than to the Secretary of State in Council under rule 7, charged or encumbered,

the provisions of sub-rule (3) of rule 7 applicable to a failure to assign and deliver a policy shall apply.

(2) If the Account Officer receives notice of—

(*a*) an assignment (other than an assignment to the Secretary of State in Council under rule 7), or

(*b*) a charge or encumbrance on, or

(*c*) an order of a Court restraining dealings with—

the policy or any amount realised thereon, the Account Officer shall not—

(i) assign or re-assign or make over the policy as provided in rule 8, or

By notification No. 6424L.R., dated the 9th May 1931, published at page 566, Part I of the *Calcutta Gazette* of the 14th idem, it was announced, for general information, that the estimate of probable expenses to be incurred, in respect of the repairs, maintenance and works connected therewith of the Jokee Embankment in the Contai subdivision of the Midnapore district, for a period of fifteen years, commencing from the 1st April 1931, amounted to Rs. 13,215 at the rate of Rs. 881 per annum. As required by section 63 of the Bengal Embankment Act, 1882 (II of 1882), this estimate was published locally with a general notice calling on all persons interested to prefer such objections as they might think proper to the Collector of Midnapore against that amount being fixed as the total sum payable.

2. In pursuance of that notice, six petitions of objections were filed by Nibhanani Dasi, Ramanath Maity and others before the Collector. The petitioners generally urge that their mauzas are not benefited by the embankment. The Governor in Council has carefully

considered the petitions and is satisfied that the petitioners' lands are benefited by the embankment and, therefore, rejects their objections.

ORDER—Ordered that a notification under section 63 of the Bengal Embankment Act, 1882 (II of 1882), fixing the sum of Rs. 13,215 as payable at an annual rate of Rs. 881 during the period of fifteen years, commencing from the 1st April 1931, by the zamindars of the estates benefited by the repairs, maintenance and works connected therewith of the Jokee Embankment, be published in the *Calcutta Gazette*, and that a copy of this resolution be forwarded to the Commissioner of the Burdwan Division for information and for communication to the petitioners concerned; also that a copy be forwarded to the Irrigation Department of this Government for information.

2 Chaprasis.	1 Scytheman.

The Committee of Management have the honour to report that throughout the year the standard has been fully maintained both as regards the number of exhi[illegible] in the collection and their condition. The garden again [illegible] heavy loss in the death from verminous colic and enteritis of the female Indian rhinoceros, of which the mate, as reported in the last annual report, died from the effects of arsenical poisoning.

The specimen lived in captivity for 29 years and the Garden would have had no specimen of this important animal had it not been for the kindness of Her Excellency the Countess of Willingdon, who presented a very fine young male to the Garden, for which most welcome gift the cordial thanks of the Committee of Management and of the public are due to Her Excellency.

The following structural improvements were undertaken during the year:—

(1) *Quarters for the First Assistant Superintendent.*—This matter had been under consideration for some time, but for want of funds execution of the project had to be deferred. During the year under report the Overseer's quarters at the Kidderpore gate, which were lying vacant, were, after thorough repairs, additions and alterations, converted into suitable quarters for the Assistant Superintendent.

(2) *Raising the boundary wall.*—The boundary wall of the Ga[illegible] along the Orphangunge Road and also between the Garden and [illegible] Observatory was found to be too low on account of the raising of Orphangunge Road and the paddock, and experience proved that acc[illegible] over the wall was too easily accomplished. Portions of the wall betwee[illegible] the Kidderpore gate and the Superintendent's quarters and between [illegible] Garden and the Observatory have been raised as necessary.

(3) *Improvement in the rhinoceros enclosure.*—Extensive improvements were made in the rhinoceros enclosure. The gro[illegible] were considerably raised and a cement wall 7 feet [illegible] 314 feet long and 20 feet wide constructed to pre[illegible] from fee[illegible]ing these animals.

(4) The introduction of trench and wall in the paddocks in place of steel fencing having proved successful, it was extended by 294 feet. Advantage was taken to raise the adjoining low lands and to provide for proper drainage.

(5) The land lying in the western and eastern sides of the store godown, which was formerly insufficiently protected by fencing, has been enclosed by a brick wall 7 feet high.

(6) *Extension of the pheasant enclosure.*—To provide additional accommodation for the increasing number of pheasants, the existing pheasant enclosure was extended to the west by 36 feet.

(7) The terraced paths over the two bridges of the Garden required constant attention to keep them in order, and it was decided to dismantle them and substitute artificial stone flooring which should prove more permanent. This has been done.

Greater attention was paid to the general annual repairs to the buildings in the Garden, and repairs to iron and wood work were carried out as usual and painting to most of the houses was effected.

The grounds and gardens were maintained throughout the year in as good a condition as was possible. The grass lawns in front of the refreshment pavilion and the band stand were dug up, raked and rolled and *doob* grass planted.

The display of flowering annuals, specially the dahlias, was very successful and the Garden was awarded several prizes and certificates for exhibits at the flower shows held by the Agri-Horticultural Society of India.

The fi[illegible] condition of the Garden, notwithstanding the fall in the entrance receipts owing to present economic depression, may be considered as satisfactory on the whole.

A large number of children unde[illegible] years of age and school children, attended by their teachers, were [illegible] free.

In addition, 48,542 persons visited the Garden on free days. A detailed statement of the number of visitors and receipts appears in Appendix B.

In consequence of the gradually diminishing gate receipts during the Fancy Fair days when the admission fee was one rupee per head, arrangements were made to keep the Garden, excluding the Fancy Fair, open to visitors who did not wish to visit the Fancy Fair, at the ordinary charge of one anna. The experiment proved successful and the turnstiles recorded 15,984 one-anna visitors while 6,071 people visited the Fancy Fair on 31st December 1931 and 1st January 1932.

The thanks of the Committee are due to those ladies and gentlemen who have added to the zoological collection, a list of which is given in Appendix C. Thanks are also due to those who kindly offered to present animals to the Garden, but whose offers could not be accepted either because the particular species was already sufficiently well represented or owing to want of accommodation.

The Committee also desire to express their thanks to the following Railway and Steamer Companies for kindly conveying the animals belonging to the Garden free of charge:—

East Indian Railway, British India Steam Navigation Co., Ltd., Peninsular and Oriental Steam Navigation Co., through Messrs. Mackinnon, Mackenzie and Co., and River Steam Navigation Co., Ltd., through Messrs. Macneill and Co., and Messrs. Hoare, Miller and Co., and Lionel Edwards, Ltd.

The Corporation of Calcutta sanctioned a grant of Rs. 26,233-6 to the Garden for the year under report, and the amount of the rate bills in respect of the Garden was adjusted against the sanctioned grant as the rate bills fell due. The Committee desire to take this opportunity or expressing their renewed thanks to the Corporation of Calcutta for their generous contribution to the funds of the Garden.

Thanks are also due to the Officer Commanding and Officers of the 1st Battalion, 5th Mahratta Light Infantry, stationed at Alipore, for permitting their regimental band to play at the Garden on Tuesday afternoons, free of charge, and to Lt.-Col. G. C. B. Buckland, Officer Commanding, 1st Battalion, 8th Gurkha Rifles, for his kindly allowing his band to play at the Garden free one day in the week from 18th December 1931 to 22nd January 1932.

The Committee are much indebted to those members of the public who send old and broken-down horses to the Zoological Garden, where they are disposed of under the most humane conditions.

P. L. BUCKLAND,
President.

E. H. MARSHALL,
Honorary Secretary.

Superintendent's Report.

The following comparative table shows the numbers of the various collections during the last four years:—

Year.		Mammals.	Birds.	Reptiles.
1928-29	.. ..	342	1,196	173

No. 3794, dated Calcutta, the 22nd August 1932.

From—L. R. Fawcus, Esq., i.c.s., Secretary to the Government of Bengal, Agriculture and Industries Department,

To—The Honorary Secretary, Zoological Garden, Calcutta.

Minister-in-charge: The Hon'ble Nawab K. G. M. Faroqui, Khan Bahadur.

I am directed to acknowledge receipt of the Report of the Honorary Committee for the management of the Zoological Garden, Calcutta, for the year 1931-32, forwarded with your letter No. 56, dated the 31st July 1932/2nd August 1932, and to congratulate the Committee and particularly those members who have given personal services in the supervision of the garden on the success of their efforts to make it attractive to the public and to get their support.

2. The thanks of Government are also due to the Corporation of Calcutta for their generous contribution to the funds of the garden and to the ladies and gentlemen referred to in the report who have made donations and presented animals to the garden.

Resolution on the Report on the Police Administration of the Bengal Presidency for the year 1931.

GOVERNMENT OF BENGAL.

Police Department.

RESOLUTION—No. 4057Pl.

CALCUTTA, THE 29TH AUGUST, 1932.

Read—

The Report on the Police Administration of the Bengal Presidency for the year 1931.

Mr. T. J. A. Craig, C.I.E., held the office of Inspector-General of Police throughout the year.

2. **Eastern Frontier Rifles.**—The Eastern Frontier Rifles maintained their reputation as a unit reliable in any emergency, and the work of the detachments sent to Chittagong district was invaluable. The Governor in Council congratulates the battalion on its efficiency and devotion to duty in trying circumstances. It is gratifying to note that the good service of Subadar Major Ganesh Bahadur Chettri was recognised by the award of the Membership of the Order of the British Empire.

3. **Recruitment and Health of the Force.**—The number of constables recruited was 2,159 against 1,899 in 1930, while the total number of vacancies at the end of the year was 56 against 146, 206 and 377 in the three previous years. The only force of additional police under section 15 of the Police Act was one of 120 men quartered in certain areas in Chittagong district. The additional police employed elsewhere at the commencement of the year were withdrawn, some on the expiry of the period for which they were sanctioned, others as a result of the Irwin-Gandhi agreement of 5th March.

An important addition to the Range Reserves of armed police was made during the year in the shape of a temporary force of 945 constables with their complement of officers, in order to meet the disturbed conditions which resulted from the civil disobedience movement. The additional force of 500 men mentioned in last year's resolution was merged in this force.

It is regrettable that th[illegible] of enrolling Namasudras [illegible] branch has not so far given satisfactory results, but it is being continued.

Casualties show a decrease under all [illegible] percentage fell from 7·[illegible] 1930 to 5·7 in the year under review, the lowest figure recorded since 1912. His Excellency in Council notes with satisfaction that there was a marked drop in the number of resignations and that there was again an increase in the number of constables of three years' service and over, there being at the close of the year 15,969 such or nearly 500 more than in the previous year.

Admissions into hospitals increased from 13,244 in 1930 to 14,390 in the present year, partly owing to extra work and extra strain, partly to men having to be kept for prolonged periods in unhealthy places often in temporary and unsuitable quarters, and partly owing to indifferent housing conditions. It is regrettable that housing conditions cannot be improved at present, owing to financial stringency.

4. **Discipline.**—His Excellency in Council notes with pleasure that, in spite of the extra duties imposed on the force during the year, its discipline was maintained at a high standard. There was a marked decrease in the number of officers and men judicially punished as well as in the number dealt with departmentally. The number of complaints instituted against the police by private individuals fell from 368 in the previous year to 253, and only 18 cases ended in conviction.

5. **Crime statistics.**—There was a decrease in the number of cognizable [illegible] number of [illegible] offences ag[illegible] and property showed an in[illegible] of 1,15[illegible]. There were 1,212 cases of rioting against 1,608 last year, but the number of cases of murder, robbery and dacoity increased. This increase in serious crimes is attributed to the distress resulting from trade depression and to the civil disobedience and other movements which created a spirit of lawlessness among the people.

Thefts of arms remained at a high figure and showed a slight increase over last year's figure, the largest number being reported from Mymensingh.

[illegible] **Crimi[illegible]al Tribes.**—The conduct of the [illegible]inmate[illegible] of the Karwal Nat Settle-[illegible] [illegible]dpur was good on the whole, [illegible]trial school for children at Nilphamar[illegible]ntinued its good work, but the subseq[illegible]t placing and employment of the child[illegible]till presents a very difficult problem. [illegible]

7. **Working [illegible] the Rural [illegible]**—[illegible] Efforts to seduce them from their [illegible]giance continued at least in some districts during the year, and economic and other causes combined too often to make the payment of chaukidars' salaries irregular, yet in spite of these adverse circumstances the rural police remained as a whole loyal. Several instances of bravery and devotion to duty are recorded by the Inspector-General, notably that of the dafadar in Dacca, who, though mortally wounded in arresting a notorious criminal, held on [illegible] his man [illegible] help arrived, and the chaukidar in Midnapore, who was killed while attempting to arrest a man in the act of committing dacoity.

It is disappointing to read that in spite of all efforts little real improvement was achieved in the matter of securing co-operation between the police and union boards in exercising control over known criminals and the patrolling of affected areas.

8. **Revolutionary crime.**—The Governor in Council has read with great interest and strongly recommends for perusal by the public the informatory survey of the history of terrorist crime in Bengal since 1907, which is set out in Part VII of Mr. Farmer's report. During 1931 terrorist crimes and activities were a source of continuous anxiety and no less tha[illegible]67 outrages were committed together [illegible]h 9 murders includ-[illegible]hose of M[illegible] Peddie, [illegible] [illegible] Stevens of [illegible] [illegible] Khan Bahadur Ahsa[illegible] [illegible]nspector of Police[illegible] The serious[illegible] of the position led t[illegible] promulgation in October of Ben[illegible]al Or[illegible]nance IX of 1931, which ex[illegible]nded th[illegible] scope of the Bengal C[illegible]minal Law Amendment Act, 1930, so as to permit of action being taken against members and helpers of terrorists' associations. To deal with the situation in Chittagong, where a considerable and very active body of absconders of the Raid Case remained at large, Ordinance XI of 1931 was promulgated on 1st December, which gave wider powers to the executive and also provided for more speedy trials of cases connected with the revolutionary conspiracy. To implement the Ordinance a body of regular troops and increased police forces were drafted into the district.

9. **General.**—The outstanding features of the year were the general spirit of lawlessness which was an aftermath of the civil disobedience movement, the activities of the terrorists and the widespread economic distress in the country. These conditions naturally placed a heavy strain on the police. His Excellency in Council takes this opportunity of congratulating the force on their devotion to duty, their fortitude in the face of danger and their cheerful endurance of hardship in trying circumstances.

It is regrettable to have to record that six members of the force, including that valued officer Inspector Ahsanullah of Chittagong, were killed and 140 injured in the course of the year in the execution of their duty.

10. **Commendation of Officers.**—His Excellency in Council has read with pleasure the names of the officers brought to his notice by the Inspector-General of [illegible] and records his high appreciation of the valuable services rendered by them to the State during the difficult conditions of the past year.

Particular credit is due to Mr. T. J. A. Craig for maintaining the discipline and efficiency of the force at their usual high standard during a year the conditions of which, if somewhat less fraught with danger and anxiety than 1930, were very far removed from normal.

ORDER.—Ordered that copies of the resolution be forwarded to the Inspector-General of Police, Bengal, the Commissioner of Police, Calcutta, and all Commissioners of Divisions for information.

Ordered also that the resolution be published in the *Calcutta Gazette.*

...RICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 31st August 1932.

Summary.—During the week the rainfall was generally light to moderate. More rain is needed for the field operation for winter paddy. Reaping of autumn paddy is nearing completion. Cutting, steeping and washing of jute are progressing but insufficiency of water for steeping is still being felt in some high land tracts of North and East Bengal districts. Condition and prospects of standing crops are reported to be generally fair. Distress prevails in parts of Pabna where 108 persons attended the test relief works on the last day of the week ending on the 27th August 1932. The average price of common rice for the Province has risen by about 0·03 per cent. as compared with that of the previous week.

(3) The Advocate or the party to whom a memorandum is returned under clause (*2*) may apply to the Registrar for time to put in the requisite Court-fee. In other cases or when the requisite fee is not paid within the period fixed, the Registrar shall lay the matter before the Division Court for orders.

(4) If a memorandum which has been returned under clause (*2*) and for filing which no time under clause (*3*) has been fixed is refiled, sufficiently stamped, after the period of limitation has expired, it shall be presented direct to the Registrar, and the latter may pass an order for the admission thereof or lay it before the Division Court for orders accordingly as, in his opinion, a case as to mistake as referred to in clause (*3*) has been made out or not.

(6) In the case of a memorandum which is not in proper form or is not accompanied by the necessary papers the Registrar may fix a period or such further period or periods within which such memorandum must be amended or the necessary papers supplied or may lay the same before the Division Court for orders.

Annual Report of the Royal Botanic Garden and the Gardens in Calcutta and of the Lloyd Botanic Garden, Darjeeling, for 1931-32.

ROYAL BOTANIC GARDEN.

1. **General.**—*It is seldom that gardens in this part of the world remain unaffected throughout a whole year by one or other of the natural calamities that make the care of plants a kind of business attended by risks unknown to others.*

As only too common elsewhere the gardens are suffering from the prevailing slump with its attendant state of financial stringency, and when to shortage of funds is added the short temper of nature bringing destruction on man's efforts to display her beauty, a gardener's lot, like that of one better advertised, is not always a very happy one. But here his the duty is to be done and a year's account of it is now due.

Although heavy rain falling late interferred with the time of planting of the cold weather annuals, and a long period of drought with high temperature towards the end of the year left the bedded display of these far below normal, no extensive damage resulted to the stocks of potted annuals intended for staging in the more frequented avenues and centralised portions of the garden, so that, in this respect, and by the methods now adopted for cold weather displays, no very marked deterioration was apparent. At its worst the failure of this class of plant to reach a degree of admired excellence merely detracts from appearances and leaves the garden temporarily less attractive than it would otherwise be. It has no lasting effect, for the beauty, while fleeting, is restorable year by year to the degree that efforts to care for it are made. It is the advent of calamity that takes years to make good that the gardener dreads. In its most destructive form we have the cyclone, and to this cause we have regretfully to report the loss during the year of some valuable and almost unique garden specimens that have been the admiration of visitors for over the best part of a century. Among others, and itself the greatest, was the loss of one of the magnificent specimens of *Ficus altissima* that served as shade and shelter to public at the ghat entrance to the garden. While it is not completely destroyed, it is doubtful whether the attempts that have been made to save the portion that remains will be successful. The garden could have lost a hundred other specimens that would, all told, have affected the scenic effect less than the loss of this, and from the point of view of visitors there were few trees here that offered a shade more needed or at a more convenient place. One is exercised now with the decision as to whether it should be removed altogether to make place for another specimen, for the stateliness of this entrance can henceforth never be what it was.

Repeated reference has been made in reports of late years to the dying condition of the Banyan tree, a central attraction for all visitors to the garden. The main trunk with its largest adjacent branches is gone but the vitality of the periphery remains and the tree is still spreading although in detached portions. The vitality of this specimen is surprising; the circular road round it has had to be extended outwards to make room for new rooted supports to the younger branches. It is still good, possibly for years, and though closer examination leaves one with the feeling that it has lost some of its unique character, no evidence of the lack of unity caused by decay of the central portion is apparent from the outside.

In pursuance of the general policy of making use to the best advantage to the garden as a whole of the funds made available, part of the garden provision has again been diverted to the repair and renovation of roads. These works are intended ultimately for departments specialising in them, but as hitherto it has not been found possible to finance this transfer, and as long neglected roads impair to the extent they do both the appearance and utility of the garden, power to distribute the provision made to the best all round advantage has been freely exercised. But the gardens are living to some extent on capital as is plainly evident from the state of its tanks. In the exercise of such appropriation some of the roads have benefited, but the requirements of modern traffic were not in mind when they were originally constructed and the best that can be had from our modest budget provides but a fleeting improvement.

The roads receiving attention include the Wallich Avenue, the Banyan Tree Circle, the Roxburgh Avenue, the Scott Avenue and the Wight Avenue. These have been tackled because the increased volume and speed of motor traffic along them, with its attendant clouds of dust, was markedly injuring some of the more delicate garden collections, and, besides, was a cause for complaint from garden foot visitors here for pleasure or recreation or on educational pursuit.

The position that these gardens occupy as a haunt for such pursuits is perhaps not so fully appreciated as it ought to be. For the well-to-do, a club, a sports ground or a golf course forms a centre where the socially minded meets his fellow men, where views are exchanged and friendships made and where the anxieties of business and of life are for a time forgotten. In a sense these are functions that the Botanic Garden serves for an Indian population. If it is less select in its membership the Botanic Garden yet forms a sort of meeting ground for that large and interested cosmopolitan crowd of Indians who make daily use of its shady retreats for social intercourse, for recreation and for contemplation. No one who visits these gardens, and especially on holidays, will fail to be struck with the bearing and appearance of happy contentment that characterises its thousands of Indian visitors. The Botanic Gardens vie with the Zoological Society's Garden and with the Indian Museum as an attraction to the crowds of Indians from other parts who visit Calcutta every year. Whether or not it be that the poorest Indian family possesses its patch of ground somewhere, the people of this country are notoriously fond of their gardens, and if there is one institution more than another that can count on a more lively interest being taken in it in years to come this is the Botanic Garden. That with others it must suffer in the present unhappy state of the country's finances goes without saying, but it will do no harm—it may do good when the axe of further retrenchment is being sharpened—to present the gardens in their true setting, that of an institution whose attractions appeal particularly to our Indian friends and remain patronised chiefly by them, an institution whose well-being they at least have at heart.

Of recent years the costs of some prominent improvements to the garden have been met by way of return for privileges accorded to public companies. But for the concession to use the garden as a short cut for mains to the industrial area west of us we might still be without an electric supply, and the necessity of a building now found indispensable over the Calcutta Electric Supply's tunnel on the right bank, dictates the advisability of combining garden's with the same company's requirements. Plans have been drawn up for a building to serve as a public kiosk in addition to a tunnel exit, and in the combination there is good hope for a belief that a long felt public need will be satisfied before another year is out. When completed it is proposed to lease out the kiosk to some firm of standing who will be asked to cater for all classes of garden visitors, and one can think of no scheme better calculated to enhance the garden's claim to a visit. With the lease would go liability for the provision of drinking water as well as light refreshments, and lawns bordered with potted annuals and adjoining shade would be specially cared for to add to the attractiveness of the locality. While the use of a site as exit for this tunnel—an enterprise now happily crowned in success—does not detract in any way from the amenities of the garden, it is excellent to think that the part played by the gardens in promoting the interests of the company should so soon have its reward in this form of co-operation.

The collections were maintained and added to as facilities existed. Seeds of flowering annuals were obtained at a cheaper rate than has been charged in the past. Germination was fairly good and although individual blooms failed to attain the excellence of those of previous years, a good effect was obtained by mass formation. It is questionable indeed whether the great difference in price justifies us in going in for highly selected seed stock. If the intention is to grow blooms for flower show purposes then the best seed is indispensable, but this year we gained a result, so far as ordinary garden purposes were concerned, by no means so far behind that previously attained, and in any case we had to cut our coat to our cloth and make do.

The plant houses were well maintained. The beds were dressed with liberal quantities of leaf mould and an improvement was noticeable in the growth of the plants. In the palm houses more consideration and attention is being given to the delicate and rarer kinds of palms. Species which grow well in the open garden have on occasions been interplanted with the more delicate shade loving kinds, but with increase of stock of the latter the need for this no longer exists, and gradual

elimination of those which rightly find their place in the open will leave room for a richer variety of the rarer or more delicate species. The process can only be gradual for it would not make for improvement to see wide gaps occupied by unsuitable sizes of even the rarer plants. Other foliage plants are well represented and there was a good collection of the different kinds.

The show of Orchid plants in flower, which some years ago was a feature of the garden, was limited to a few of the commoner varieties. Retrenchment has deprived us of the services of plant and seed collectors on whom we were wont to depend for these, so that the loss of this attraction, one much appreciated by the visiting public, was beyond our ability to make good at short notice. But the display is too valuable to be lost to the garden permanently, and arrangements are contemplated to make good the collection in one way or another. There are several well-known Orchid fanciers about Calcutta with whom we might get in touch with a view to exchanging such material as we can spare for what they may be willing to give. If any of them see this and are willing to help, the Curator would reciprocate in any way open to him, and garden authorities would be grateful for this interest.

The general appearance of the garden lawns and open spaces was fairly well maintained. No permanent disfigurement to the garden results through these being left for periods uncut, and if they were not as tidy as they have been in the past the worst this signifies is something of a passing nature. The saving resulting from the smaller attention paid was considered better spent in other directions. The advantage that the motor tractor brings to this matter of garden conservancy cannot be overestimated. It is not popular with the grass cutters and others interested, but the speed with which it gets through work has given it a place apart amongst garden machinery and it has already repaid itself many times over. With an attachment for use to drive watering pumps it should prove a still greater boon in the coming year.

The distribution of seeds which forms a regular feature of garden work comprised 236 packets and 311 pounds. Never a day passes without requests for one kind or other, and all applications for seeds of an economic kind that cannot be dealt with by the Forest and Agricultural Departments usually find their way here. Often the difficulty and expense of collection is beyond us, but there must be few Horticultural, Agricultural and Forest Institutions in the world that have not at one time or another benefited by the services rendered.

Living plants for roadsides and other purposes to the number of 15,042 were distributed to District Boards, Educational Institutions and Government bodies and a certain number received in addition to liberal quantities of seed. The outstanding importation was a large consignment of over half a ton of *Aleurites Fordii*, the Tung Oil yielding species. The interest taken in this plant of recent years has now extended to India. The tree, a Chinese species, is extensively grown in the Southern State of America, and the services of Kew have been given to securing its now wider distribution. Very many firms in India, especially those interested in tea growing, have undertaken to experiment with it, and records already received from some quarters show that fair germination has been obtained. The Botanic Gardens were approached for service in connection with the Indian distribution and were happy to be able to promote the enterprise. A small packet of the seed was retained for garden experiment as it was feared that the long voyage had affected its viability. The fears happily proved unfounded and a batch of the young plants is now under observation with us. A near botanical relative, *Aleurites molluccana*, has been in cultivation at Sibpur for many years and grows well here. The Tung plant, however, would seem to require a drier climate than lower Bengal can offer, and lengthy experiment alone will prove the possibilities of its cultivation. Tung Oil is greatly in demand in commerce as a quick drying oil for the paint trade.

Seeds of other interesting and new plants have been received but these are still in the nurseries or seedlings stage and their suitability to India or this climate is not determined. Two plants of the Elephant's Foot, *Testudinaria Elephantipes*, were successfully imported from Africa through the aid of the South African Department of Agriculture. Both are doing well. The services of the Department in arranging for a consignment of wardian cases with rooted mango stock for export to South Africa have, unfortunately, not been crowned with much success. Selected stock left Bombay in good condition but must have had bad treatment on the way, for only a small part of the consignment arrived in good condition at Durban. The danger to plants under

transport is always feared but the loss is none the less regrettable even if it forms only one more instance of the difficulty of distributing living plant material in the tropics.

A total of 102 plants were planted out in the garden and given permanent numbers during the year. Some ornamental planting to improve the entrance was done at the Banyan Gate; the blanks in the row of *Chrysalidocarpus* by the side of the Palmyra Avenue were filled in and other planting done to replace deaths.

2. **Herbarium and Library.**—Routine work of the herbarium went on as usual under the four main departments of activity, namely, identification, acquisition, loan of specimens and distribution.

The miscellaneous work of examination of drug-producing plants, such as opium and *ganja*, for legal cases calls occasionally for the interruption of more normal duties. The total number of phanerogamic species identified during the year by the herbarium staff proper amounts to 1,100. These have come from the same wide range of correspondents as formerly.

The Curator's special interest in the *Algæ* as a group of plants is gaining recognition and involves increased work on account of enquiries made regarding them and their economic bearing. Algological work is of considerable importance economically, for the presence of these organisms in town water-supplies and their relation to pisciculture gives them an importance that brings their treatment at once within the scope of the specialist. Some aquatic members of the *Algæ*, although a group of plants of worldwide distribution, demand special conditions as to light, nature and temperature of water and association with other organisms for their proper development; and while the presence of some of them may even be beneficial, there are others that cause considerable damage and nuisance to those responsible for the purity of water-supplies.

The Calcutta tanks that supply the city's water present a special algological problem to the practical solution of which a knowledge of the organisms present becomes, therefore, indispensable, and the specialisation of the Curator in this field has not been long in finding its immediate application. In common with other water vegetation the *Algæ* themselves bear also on the question of suitability of breeding grounds for the malarial mosquito. For the field engineer or malariologist, whose energies are directed to combat the disease by the elimination or sterilisation of breeding grounds, an easy means to recognise the commoner types of water plants has been a want felt for some time. The expense of producing an easy illustrated guide for such workers is out of the question for us, but the question of finance is engaging the attention of the Medical Department and, if this be settled, the herbarium staff has promised to do the descriptions and illustrations for a suitable brochure. It would naturally limit itself to the commoner types of water vegetation, but even so its utility can scarcely be doubted.

The herbarium has been enriched by the presentation of some 634 sheets, including two new species of *Impatiens* from Madras and about 46 duplicates from the United States National Museum, Washington. The bulk of the receipts, however, comprise Malayan duplicates of which use has been made for further distribution and for replacement of existing cabinet material.

Distribution has been handicapped by the retrenchment of Government of India collectors on whom the herbarium was wont to rely for the collection and preparation of local material, and also by the enforced curtailment of touring. Nevertheless, some 1,575 specimens have been sent to institutions abroad and individual requirements for plant material in spirit and otherwise, of seeds and of figures copied from the library [illegible]ones attended to.

Over 3,000 genera covers were renewed and brought into line in respect of nomenclature with modern monographs dealing with their contents. Co-operation with botanists visiting the herbarium in connection with their general work or on special quests was freely given.

The library is suffering very badly under present conditions. This follows from the precedent of meeting expensive plate publication out of library funds proper. The sequence of only the most essential periodicals was maintained by purchase, and practically no new books outside some presentation copies were obtained. It remains to be seen whether the deficiency will ever be made good, for it is easier to lose library headway than to get the wherewithal to make it good even when there is little room for the plea of financial stringency.

Work on a new library catalogue is well advanced and the collections of books and periodicals carefully maintained.

3. **Publications.**—*Mr. Narayanaswami's work on the Malayan localities of plants mentioned in literature bearing on this part of the world has gone to Press.*

The progress of work on illustrations for Sir David Prain and Mr. Burkill's monograph of the *Asiatic Dioscoreas* has had to be curtailed, but some 20 plates were issued from the Press during the year. The manuscript itself is now in the hands of the printers.

In the press the works of Mr. Biswas, are—"A Review of the Indian Avicennias," "An Oecological note on the vegetation of Lower Burma," "A short note on the systematic position of an Homalium" and "A Census of Indian Algæ." Mr. Badhwar's work on new Indian Mosses is complete in manuscript and Mr. Bal's Catalogue of Medicinal Plants exhibits in the Industrial Section of the Indian Museum has been issued and is under distribution. Some of these are for departmental publication, some for the Botanical Survey and some for outside periodicals.

4. **Finance.**—Out of a total budget allotment of Rs. 61,629 for staff and permanent establishment, Rs. 50,754 were spent and under other heads the expenditure amounted to Rs. 63,329 against the total allotment of Rs. 63,810. Rupees 8,466 were surrendered leaving a net saving of Rs. 2,890 under various heads and not available for reappropriation to others. Receipts of the department during the year amounted to Rs. 779.

5. **Staff.**—The writer held the post of Superintendent throughout the year except for the period from May to November when Mr. Biswas for the first time officiated with ability in addition to his own duties as Curator of the Herbarium. Mr. J. E. Leslie was Curator, Messrs. Jones and Quasim Ali, Assistant Curators, Mr. Joneja, Overseer, and Mr. Gholam Mohiuddin, temporary Overseer. Mr. S. N. Basu held charge at Darjeeling throughout the year. All officers and clerical staff have co-operated in this time of stringency to make the resources available go as far as possible. The office of head clerk was held by Babu Ashutosh Banerji on whom falls an ever-increasing amount of duty in connection with financial returns and who for his readiness to work at any and every time deserves special commendation.

CALCUTTA GARDENS.

Work in these gardens was again mainly of a routine character. The seed for the beds of flowering annuals came from the same stock as used for the Royal Botanic Garden and gave similar results.

For pot plants better selected seed was employed, and the same practice of staging out potted groups followed as at Sibpur.

The triangular plot of shrubs facing the High Court was this year converted into a flower bed with a view to enhancing first effects on visitors entering the garden by this gate. The gardens occasionally suffer from the crowds that use them as a short cut to the football matches on the maidan, and some 200 feet of hedging had to be made good from this cause. The south entrance to the nursery has been widened to admit a motor lorry for the more economic delivery of material. A new pathway to replace the unsightly footway which the public had made as a short cut to the cricket ground has been constructed near the tennis courts. This concession to destructive practice connoted an effort to do the best possible for this usually untidy section of the garden.

No provision could be found for the garden roads in general this year and only slight departmental repairs and surface dressing was possible. Notice boards and benches in all the three gardens were repaired and repainted.

Some 25 new trees have been planted out, 20 permanent additions to the gardens that had grown large enough to be taken notice of were labelled and 40 new additions made to the plant house.

The general condition of the gardens, and especially the western half of the Eden Garden, showed some improvement in the course of the year.

Finance.—Out of a total budget allotment of Rs. 23,176 under all heads, Rs. 23,059 were spent, Rs. 93 were surrendered under Europe Stores and a small saving of Rs. 24 effected. Receipts credited were Rs. 250 mostly from fishing passes.

LLOYD BOTANIC GARDEN, DARJEELING.

The monsoon was active giving a total rainfall of almost 126 inches which is in excess of the average. Hours of recorded sunshine prove a very dull year extending over several months. Apart from some special schemes of garden improvement only routine garden maintenance was carried on. For its size the Lloyd Botanic Garden is one of the richest and best in India as the elevation of Darjeeling is not so high as to make the introduction of some of the lower elevation Himalayan species impossible, nor yet too low for the introduction of some of the choice species that find their best development at greater heights. Of special interest this year has been the Curator's success in growing species of *Meconopsis*. Although inhabitants of the Himalaya, at elevations of 12,000 to 15,000 feet or thereby, these plants do not, as a rule, do so well in local hill gardens as they do as introductions to Europe. Suitable shade and protection from the rain proved what was required this year to secure success. The experiment is of some importance, for there exists in the nurseryman business a steady demand for *Meconopsis* seed, and the proximity of Darjeeling to the natural habitat of these plants would give this garden an advantage over others if a supply of seed could be grown regularly. The Curator's efforts in a direction to secure this have been praiseworthy.

Darjeeling is seldom exempt for long periods from devastating storms. Hail is common, but a fall to a depth of 12 inches such as occurred at the beginning of April, calls for more than passing reference. Needless to say, it caused destruction in a garden characterised by palms and bamboos that bear it ill as well as by *Conifers* more habituated to it. But hail can have less destructive effect than over-burdening by snow, and on this occasion it was the seedling beds rather than plants in permament situations in the open that suffered.

The general appearance of the garden was well maintained and a few attempts at its improvement made. These include the establishment of a rose garden for which local as well as imported stock was utilised and the reconditioning of the garden tank. A rustic appearance has been given to this through an artistic arrangement of rocks and boulders, and a returfing and conditioning of the adjacent lawn rounds off the general effect. Although the scenic effect is not lost thereby, the general arrangement of this garden follows botanical rather than geographic lines, and a stricter conformity with this principle has called for the transference of misplaced plants and shrubs to their appropriate botanical groups. This also was undertaken during the year.

The *Azaleas*, *Camellias* and *Cherries* imported of late are doing so well as to claim the special attention of visitors. Some 400 trees and shrubs were planted out during the year.

Seeds to the number of 2,412 packets, plants 645, seedlings over 12,000 and 136 bulbs were distributed, figures which prove at once a wide knowledge of the distributing service rendered by Darjeeling and of the dimensions of this work. Collections of higher Alpine seeds and plants were made as occasion permitted.

Six wardian cases of Alpine plants for His Majesty's Royal Park were collected and despatched to London and in the course of this work the following seeds were gathered and germinated at the Lloyd Botanic Garden.—*Meconopsis Wallichii*, *Meconopsis nepalensis*, *Meconopsis paniculata*, *Cathcartia villosa*, *Potentilla fruticosa*, *Swertia tibetica*, *Swertia multicaulis* and some *Primulas*, *Sedums* and *Anemones*.

According to the registers kept by the gate durwans 39,655 people visited this garden during the year.

Finance.—Out of a total budget allotment of Rs. 20,785 there were Rs. 15,967 spent. Rupees 4,649 were surrendered leaving a small saving of Rs. 169.

FINAL FORECAST OF THE JUTE CROP, 1932.

Consolidated statement for Bengal, Bihar and Orissa and Assam.

Area.—The revised estimated area for the three provinces is 1,899,300 acres, an increase of 37,500 acres as compared with the revised final forecast for 1931. The total decrease as compared with the acreage in the Preliminary Forecast for 1932, is due to revision in the Bengal and Assam estimates.

Yield.—It is estimated that this crop will yield 5,844,600 bales of jute, exceeding last year's total (revised) by 278,100 bales.

The consolidated returns are as follows:—

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Jute Crop of Bengal, 1932.

[NOTE.—**On an average of the five years ending 1930-31, the area under jute in Bengal, to which this forecast relates, represents some 86·3 per cent. of the total area under jute in British India.**]

Season.—Excepting drought in the early part of the season, sowings were generally carried out under favourable circumstances. During the months of June and July occasional rainfall with alternate sunshine helped the growth of the crop in West and parts of North Bengal. Some injury has been caused by insects.

Condition of the crop.—The crop in parts of East and North Bengal is good. Elsewhere a fair crop is anticipated.

Area of the crop.—The area under jute is 1,633,200 acres as against 1,613,700 acres in 1931.

Outturn.—As in previous years, the percentage figures are calculated the basis of divisional normals which remain as follows:—

		Bales per acre.
Dacca and Chittagong Divisions	...	3·7
Rajshahi Division	...	3·5
Presidency and Burdwan Divisions	...	3·2

The total outturn of the crop is estimated at 5,127,500 bales as compared with 5,002,700 bales last year.

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

Final Forecast of the Jute Crop of Bihar and Orissa, 1932.

NOTE.—**On an average of the five years ending 1930-31, the area under jute, to which the Bihar and Orissa forecast relates, represents about 7·3 per cent. of the total area under jute in British India.]**

Acreage.—The final district returns of the eight jute-growing districts of the province show an area under jute of 134,800 acres. But these estimates have proved to be very low, and I have no reason to alter the estimate [illegible] in the preliminary forecast, viz., 157,000 acres. Last year's estimate of the area under the crop was 148,800 acres.

Weather conditions.—In March light rain fell in Cuttack and Balasore. There was no rain in the remaining jute districts. The fall was below the normal in these two districts. In April light rain fell in all the jute districts. The fall was above the normal everywhere except Champaran, [illegible] Santal Parganas and Cuttack. In May light to moderate rain fell in all the jute districts. The fall was below the normal everywhere except Balasore. In June rain fell in all the districts, the fall being below the normal everywhere except in Champaran and Darbhanga. In July light rain fell in all the jute districts. The fall was below the normal everywhere except Cuttack and Balasore. In August rain fell in all the districts, the fall being below the normal everywhere except Bhagalpur and the Santal Parganas. The weather conditions are reported to have not been favourable in the most important jute district of Purnea and also in Champaran and Darbhanga and fair in the remaining jute districts.

Outturn.—In the important jute districts of Purnea and Cuttack the outturn of the crop has been estimated at 50 and 81 per cent. of the normal respectively. Champaran reports 95 per cent., Muzaffarpur, Darbhanga, Bhagalpur, the Santal Parganas and Balasore report 70, 58, 50, 65 and 71 per cent., respectively.

On the basis of the area and percentage outturn reported by the District Officers the average condition of this year's crop for the province comes to 56 per cent. against 55 per cent. last year. But, in my opinion, this is an underestimate, and the condition factor will not be less than 78 per cent. of the normal. Recent enquiries about the normal outturn per acre show that the normal outturn per acre is 3½ bales, and on this basis the gross outturn on 157,000 acres estimated to be under jute in this province comes to 408,200 bales against 342,200 bales last year. The import of jute from Nepa[illegible]imated at 25,000 bales brings the total of the province to [illegible],200 bal[illegible]

Owing to scanty rainfall the outturn is expected to be normal at Bettiah and a little below normal at Sadar. There has been no change in the area since the submission of the preliminary forecast.
	Muzaffarpur ..	1,934,630	1,627,000	2,700	4,000	3,300	75	70	9,000	6,940	Not yet begun ..	The condition of the crop is good.
	Darbhanga ..	2,142,720	1,677,800	1,600	312	1,291	68	58	636	2,246	Middle of September ..	The weather and rainfall have not been favourable. The prospect of the crop is fair. The decrease in percentage outturn is due to scanty rainfall and increase in area as compared with the first forecast is due to inclusion of the figure reported by the Subdivisional Officer of Madhubani.
Bhagalpur ..	Bhagalpur ..	2,661,120	1,684,100	2,700	2,075	1,924	60	50	3,735	2,886	Middle of August. Normal.	The decrease in area is due to fall in prices.

At places sowing was late. The harvesting which is delayed has commenced. Insufficient rain for purposes of steeping and washing is preventing harvest in major portion of the district. The area shown though apparently below that of last year is not so. The figures collected last year gave a total of 100,000 acres. This was raised so far as I can see by the then Collector. This year's figures are based on those supplied by the Police. The area is over 6,000 acres more than in the last year. The increase is due to expectation of better return in jute than in food crops.
	Santal Parganas	3,500,800	[illegible]	1,000	500	500	65	65	975	975	Not yet commenced ..	The condition of the crop is good.

DEPARTMENT OF AGRICULTURE, ASSAM.

Final Forecast of the Jute Crop of Assam, 1932.

[NOTE.—**On the average of the five years ending 1930-31, the area under jute in Assam represents 5·2 per cent. of the total area under jute in British India.**]

Season.—The weather in the early part of the season was generally favourable for the cultivation and growth of the crop, but subsequently heavy rains followed by floods caused considerable damage, especially in the lower parts of the Assam Valley. The estimated outturn therefore is considerably less than was anticipated when the preliminary forecast was issued.

2. **Area.**—As estimated by the Deputy Commissioners, the area under jute is 109,100 acres as compared with last year's actual area of 99,300 acres and this year's preliminary forecast of 107,100 acres. The areas reported in the preliminary forecast have been revised in five districts.

3. **Outturn.**—The outturn per acre has been estimated to be 74 per cent. of the normal against 57 per cent. of last year. Taking 3·5 bales of 400 lbs. each of jute fibre as the normal yield per acre, the total produce of the province this year amounts to 283,900 bales against 196,600 bales (revised) of last year, or an increase of 44 per cent.

A. G. BIRT,
Director of Agriculture, Assam.

	Acres.	Acres.	Acres.			Bales.	Bales.		
Cachar ..	200	200	300	60	80	400	800	Middle of August. Early.	The increase in area is due to favourable weather at sowing time. The heavy rainfall in June and July encouraged the growth of weeds and consequently the yield is below normal.
Sylhet ..	15,000	5,000	9,100	38	90	6,600	28,700	July. Early ..	Favourable weather conditions at sowing time account for the increase in area. The weather was on the whole favourable for the cultivation and growth of the crop, but slight damage was done by sudden rise of water in June in low lying areas.
Goalpara .	60,000	35,300	36,100	45	60	55,600	75,800	End of July. Normal.	Since the issue of the preliminary forecast the crop has been considerably damaged by flood in low lying areas and hence the comparatively low outturn.
Kamrup ..	28,000	19,100	18,900	54	75	36,100	49,600	Middle of August. Normal.	The weather has not been very favourable for the cultivation and growth of the crop owing to drought at sowing time followed by heavy rainfall. Some damage was also done by flood in June.
Darrang	12,600	13,700	12,200	75	75	36,000	32,000	Middle of July. Early.	The decrease in area is due partly to unfavourable weather at sowing time and partly to the low pric. of jute. The weather on the whole has not been favourable for the crop and some damage has also been caused by flood and insects
Nowgong ..	50,000	20,400	26,400	65	90	46,400	83,200	Beginning of July. Early.	The increase in area is due to extension of cultivation. The weather has been generally favourable for the growth of the crop but some damage was done by the rise of the Brahmaputra in the latter part of June, and also by insects in places.
Sibsagar ..	400	400	300	80	85	1,100	900	Middle of August. Normal.	Unfavourable weather conditions at sowing time account for the decrease in area. The weather on the whole was not very favourable for the crop, and flood also caused some damage.
Lakhimpur ..	1,000	900	800	75	85	2,400	2,400	First week of September. Normal.	The decrease in area is due to unfavourable weather at sowing time. Subsequently the crop suffered from heavy rains and some damage was caused by flood.
Garo Hills (Plains).	5,000	4,300	5,000	80	00	12,000	10,500	Early August. Normal.	The increase in area is due to favourable weather at sowing time. The weather was generally favourable but flood in the early part of July caused severe damage to the crop, and hence the low estimated outturn.

Resolution on the Triennial Report on the Administration of the Registration Department in Bengal for the years 1929, 1930 and 1931.

GOVERNMENT OF BENGAL.

Education Department.

Registration.

CALCUTTA, THE 9TH SEPTEMBER, 1932.

RESOLUTION—No. 603 Regn.

Minister-in-charge: The Hon'ble Mr. K. Nazim-ud-Din, C.I.E.

Read—

The Triennial Report on the Administration of the Registration Department in Bengal for the years 1929, 1930 and 1931.

Rai J. N. Ray Bahadur, I.S.O., was in charge of the department until his retirement on the 16th June 1931, when Khan Sahib Maulvi Shamsuddin Ahmed was appointed Inspector-General.

2. The administration and work of the department were considerably affected by the Bengal Tenancy Amendment Act, IV of 1928, which came into force in April 1929, and provided for the payment at the time of registration of landlords' transfer fees in respect of occupancy holdings: this change also involved the maintenance, in the various registration offices, of separate accounts of expenditure in connection with the transmission of these fees.

Other legislative measures, which affected the Registration Department, were the amendments of the Indian Registration Act, XVI of 1908, and the Transfer of Property Act, IV of 1882; the former resulted in the discontinuance of duplicate indexes with effect from 2nd January 1930, while the latter required the execution by lessor and lessee alike of all non-agricultural leases.

3. From June 1931 a new procedure was adopted in Calcutta, Howrah and the 24-Parganas in connection with the departmental system of control of accounts for reconciling the discrepancies in the figures of expenditure. This is now done by means of personal collaboration between the clerks of the offices concerned and the auditors of the Accounts office. The change has already resulted in a considerable saving of time and correspondence.

4. Free use has been made of the provisions of section 35 of the Indian Registration Act and selected Sub-Registrars stationed at subdivisional headquarters were vested with powers to enquire into the question of execution, where the execution of a document is denied.

5. The three years under review showed a consistent falling off in the number of registrations. Compulsory registration affecting immovable property decreased by 34·8 per cent. and optional registration by 23·7 per cent. Other registrations, which include all registrations not affecting immovable property, wills and written authorities to adopt, decreased by 19·2 per cent. The total number of registrations in Books 1, 3 and 4 during the triennium was 3,850,414 against 5,796,589 in the preceding triennium, showing a decrease of 33·5 per cent. The receipts of the department for the period amounted to nearly Rs. 82 lakhs and the expenditure to about Rs. 56 lakhs, leaving a surplus of approximately Rs. 26 lakhs. The number of offices that worked at a deficit rose from 45 in 1929 to 113 in 1930 and 228 in 1931. The heavy fall in registration is attributed to the low prices of jute in particular and the economic depression generally.

There were 415 offices open at the end of 1931 as against 418 at the beginning of 1929.

6. The unsuitability of many of the buildings now used as offices and quarters has long been recognised but the financial stringency has prevented any progress being made with the programme of construction. For the same reason the provision of record room racks and the binding of registers have had to be postponed.

7. The total number of appeals under section 72 of the Indian Registration Act, XVI of 1908, and applications under section 73 of the Act disposed of during these three years was 3,949 against 5,846 in the previous triennium. The number of prosecutions instituted under section 83 of the Registration Act for offences under section 82 (*a*) to (*d*) of the Act was 67 against a total of 100 during the preceding period. In the cases disposed of 44 persons were convicted, of whom 35 were punished on charges relating to false statements and 9 for false personation and its abetment.

The Inspector of Registration Offices inspected 102 offices. District Registrars made 345 inspections, Sadar Sub-Registrars 1,567 and Subdivisional Officers 152 during the triennium.

Government (Ministry of Education) desire to acknowledge, with thanks, the efficient administration of the department by Rai J. N. Ray Bahadur I.S.O., and Khan Sahib Maulvi Shamsuddin Ahmed.

ORDER.—Ordered that a copy of this resolution be forwarded to the Inspector-General of Registration, Bengal, for information.

Ordered also that a copy of the resolution, together with the report, be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*.

ADDENDA AND CORRIGENDA.

No. 4365F.—17th September 1932.—The following corrections, which have been [illegible]rised, are published for general informa[illegible]

Fundamental and Subsidiary Rules, 1st Edition (Reprint), 1929.

Page 50.—S.R. 67.—For item (*2*) in the note under this rule, *substitute* the following:—

(*2*) Government servants in Eastern Bengal, who are Fellows of the Calcutta University, attending meetings of the Senate, [illegible]ties, and the Boards of Studies of the University.

S. R. 67.—*Number* the existing note under this rule as "1" and *insert* the following as note 2:—

NOTE 2.—In the following cases, the absences have been declared as "absence on duty"; but the travelling allowance is permitted to be drawn from the funds of the Calcutta University at the rates admissible under their rules:—

(*i*) Government servants in Western Bengal, who are Fellows of the University, attending meetings of the Senate, Faculties, and the Boards of Studies of the University.

(*ii*) Government servants appointed by the University to inspect educational institutions or to conduct examination in practical subjects on behalf of the University.

Page 21—F. R. 22.—*Delete* the [illegible] instruction under this rule.

Page 92—F. R. 45A.—Under clause VI of this rule *insert* the following:—

Audit Instruction.—The question has been raised whether the value of the site should be excluded in calculating the additional rent payable under Fundamental Rule 45A-VI for the special services referred to therein. Clause II of Fundamental Rule 45A definitely excludes the cost of site from the calculation

of ordinary rent, with the object *inter alia* that there should be no inequality in rents merely on account of site values. Inequalities of th[illegible]d and due to the same cause would, however, arise if the rent charged for special services included the cost of site. Ordinarily, houses of the class affected by the rule in question already have a compound large enough to accommodate the special service. If the house had no special service provided, no rent would be payable for the site; and it would not be reasonable to commence to charge rent for site, because of the provision of a special service in cases where the site remains the same. The Governor in Council has therefore decided that in the case of officers in the services under his control and those whose control has been retained by the Secretary o[illegible] in Council the value of the site should be excluded in calculating the rent of special services under Fundamental Rule 45A-VI.

Page 20—F. R. 22 as amended by correction slip No. 80.—*Insert* the following under this rule:—

Audit Instruction.—The benefits of rule 22 should be allowed in cases in which the occasion for fixation of pay of a Government servant arises on or after the date of effect of the revised rule *i.e.*, the 18th March 1930. They are not admissible in cases in which the occasion arose before the 18th March 1930, but the question of fixation of pay was actually taken up after that date.

Page 180—F. R. 107.—In the Audit Instruction as amended by correction slip No. 25[illegible]

(*1*) for the words "a permanent post" in clause (*i*) *substitute* the words "a post which he holds substantively" and

(*2*) for the words "an officiating post" in clause (*ii*) *substitute* the words "a post which he has held in an officiating capacity."

Page 174.—F. R. 105 (c).—*Number* the existing Audit Instruction introduced by correction slip No. 20 as (1) and *insert* the following as paragraph (2):—

Joining time under Fundamental Rule 105 (*c*) is admissible to military officers in civil employ on their return from military furlough out of India.

Page 28—F. R. 35—Audit Instruction.—*In[illegible]* [illegible]ollowing [illegible] paragraph (2):—

When a Government servant is appointed to officiate in a post on a time-scale of pay but has his pay fixed below the minimum of the time-scale under Fundamental Rule 35, he mus[illegible]t be treated as having effectually officiate[illegible] that post within the meaning of Fun[illegible]amental Rule 22, or having rendered duty in it within the meaning of Fundamental Rule 26. B. L. SUBARWAL,

Personal Assistant to the Chief Engineer to the Government of Bengal

Calcutta, the 13th September 1932.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 16th September 1932.

Monthly Weather and Crop Report of Bengal for August 1932.

I. **Character of the season.**—During the month under review, the rainfall was above the normal in fourteen districts, while elsewhere it was below the average. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of autumn paddy, cutting, steeping and washing of jute were progressing favourably, but more rain was needed to facilitate the transplanting operation of winter paddy in parts of North and West Bengal during the first part of the month.

III. **State of standing crops.**—More rain is urgently needed for the growth and development of winter rice already transplanted. The present condition, so far, is not promising, on the whole.

IV. **Prospects and probable outturn.**—As a result of weak monsoon prospects of transplanted winter rice are likely to be threatened. Everything depends upon the strengthening of monsoon till October. The outturn of sugarcane is expected to be favourable.

V. **Damage to standing crops.**—Some damage was caused to jute by insects in parts of West and North Bengal.

VI. **Condition of agricultural stock.**—The condition of live-stock was, on the whole, fair. Sporadic cases of cattle-disease, were, however, reported from twelve districts of the Province and from the States of Cooch-Behar and Tripura.

VII. **Failure of pasturage and fodder.**—No insufficiency of fodder was reported from any part of the province.

VIII. **Prices of food-grains.**—During the second fortnight of the month, the retail prices of common rice of the cheapest quality rose in five districts, fell in eleven and remained stationary in the rest of the Presidency. The prices varied from 15 1/8 seers per rupee in Midnapur to 10 seers in Howrah, Darjeeling, Noakhali and the Chittagong Hill Tracts.

IX. **Condition of agricultural population.**—The condition of agricultural population is not satisfactory owing to the fall in the prices of jute and other staples. Distress prevailed in parts of Pabna, where relief works continued.

Director of Agriculture, Bengal (offg.).
